

# **APPENDIX B: CONSULTATION**

*APPENDIX B1:  
PROJECT SUMMARY AND  
CONTACT LIST*

# Union Gas Limited – Windsor Line Replacement Project

## Summary for Ministry of Energy

---

### 1. Introduction

---

This Summary Report has been prepared to provide the Ministry of Energy (“MOE”) with an overview of the Windsor Line Replacement Project (“Project”), to support the preparation of a contact list of indigenous communities that may have an interest in the Project.

#### 1.1 *Project Overview*

Union Gas Limited (“Union Gas”) is proposing to replace approximately 59 km of existing NPS 10 inch diameter natural gas pipeline with a new NPS 6 inch diameter natural gas pipeline to continue to provide safe and reliable delivery of natural gas to the Windsor and Leamington area. The existing NPS 10 inch pipeline is proposed to be replaced with a smaller NPS 6 inch pipeline, which will be constructed in the vicinity of the existing pipeline. The proposed pipeline replacement is located within the County of Essex and the municipality of Chatham-Kent, and will commence at Union’s Port Alma Transmission Station and end at Union’s exiting Sandwich Station located in the vicinity of the intersection of County Rd 46 and 8<sup>th</sup> Concession Rd. A map indicating the proposed pipeline location project area is shown in Figure 1 and 2 (attached).

The following co-ordinates are the approximate proposed locations of the take off and end point for the new pipeline:

Proposed Locations	Latitude	Longitude
Take Off Port Alma Transmission Station	42.181182	-82.243789
End Point Sandwich Station	42.238944	-82.945416

---

### 2. Regulatory Requirements and Approvals

---

Ontario Energy Board (“OEB”) review and approval is required before this project can proceed. As part of that application, an Environmental Review (ER) will be conducted in accordance with the OEB Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario 7<sup>th</sup> Edition (2016). The ER for this Project is anticipated to be completed and submitted to the OEB as early as fall 2018, the proposed project is anticipated to be completed in phases with the first phase scheduled to be constructed and in service in 2019. Other permits and authorizations for the project will be determined and may be necessary at the Federal, Provincial and Municipal levels.

---

### 3. Environmental Planning Process

---

The environmental planning process for the Project will be initiated in spring of 2018 by Union Gas, with support provided throughout the process by consultant archaeologists, cultural heritage specialists, and environmental professionals. The following provides a general overview of the environmental planning process for the Project:

- **Complete an Environmental Protection Plan (EPP)**
  - Describe the proposed work necessary for the Project;
  - Describe the procedures that will be followed during construction of the facilities;
  - Identify potential environmental impacts and recommend measures to minimize those impacts; and
  - Describe the public consultation opportunities.
- **Complete all necessary studies and assessments**
  - An Archaeological Assessment will be conducted by a licensed archaeologist in accordance with the Ministry of Tourism, Culture and Sport (MTCS) guidelines to identify known or potential archaeological resources within the Project area and will develop an appropriate mitigation plan if required.
  - A heritage specialist will review the running line for potential cultural heritage landscapes and built heritage resources and will develop an appropriate mitigation plan if required.
  - A qualified biologist will review the running line for potential species at risk and determine if any species will be impacted by construction activities and will develop an appropriate mitigation plan if required.
- **Obtain all necessary environmental permits and approvals**
  - Union Gas will work with all relevant governing agencies (i.e. the Ministry of Natural Resources and Forestry (MNR), Essex Region Conservation Authority (ERCA), Lower Thames Valley Conservation Authority (LTVCA), Fisheries and Oceans Canada (DFO)) to obtain any permits and/or approvals should it be necessary.

---

### 4. Consultation

---

Consultation is an important part of the environmental planning process and may include discussions with the relevant federal and provincial agencies, municipalities, interested and potentially affected landowners, and interest groups, as well as First Nations and Metis Nations as identified by the MOE.

Union Gas will contact the County, MNR, DFO, ERCA and LTVCA to discuss and review the project. Union Gas will also contact landowners along the proposed route.

---

### 5. Project Activities

---

The pipeline will be installed using Unions standard construction practices which include grading the site, digging the trench, installing the welded pipeline in the trench, testing the pipeline, and restoring the area to its original condition.

---

## **6. Summary and Conclusion**

---

The purpose of this report is to provide MOE with preliminary information regarding the Project and acquire a list of Indigenous communities that may be interested in providing feedback during the project planning process. Field work and data collection will be undertaken to determine the potential effects of this Project during the construction, and operation phases. Mitigation measures to manage these potential effects will be identified and will include proposed monitoring and contingency plans which will be implemented to ensure effects are minimized.

*APPENDIX B2:  
NEWSPAPER NOTICES*

# ENBRIDGE GAS WINDSOR PIPELINE REPLACEMENT PROJECT

## Information Session

You are invited to attend an Information Session for the proposed Windsor Pipeline Replacement Project.

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

An integral part of this project is the completion of an environmental study of the construction and operation of the proposed pipeline and related facilities by an independent environmental consultant, Stantec Consulting Ltd. (Stantec). Stantec is hosting an Information Session to provide those interested in the project an opportunity to review the project and provide input to the planning process. The Information Session will be conducted as a drop-in centre, with representatives from both Enbridge Gas and Stantec available to receive comments and answer questions.

The Information Session will be held at the following time and location:

**Wednesday, Feb. 20, 2019**  
**4-8 p.m.**

Ciociaro Club of Windsor  
3745 North Talbot Road  
Oldcastle, ON N0R 1L0

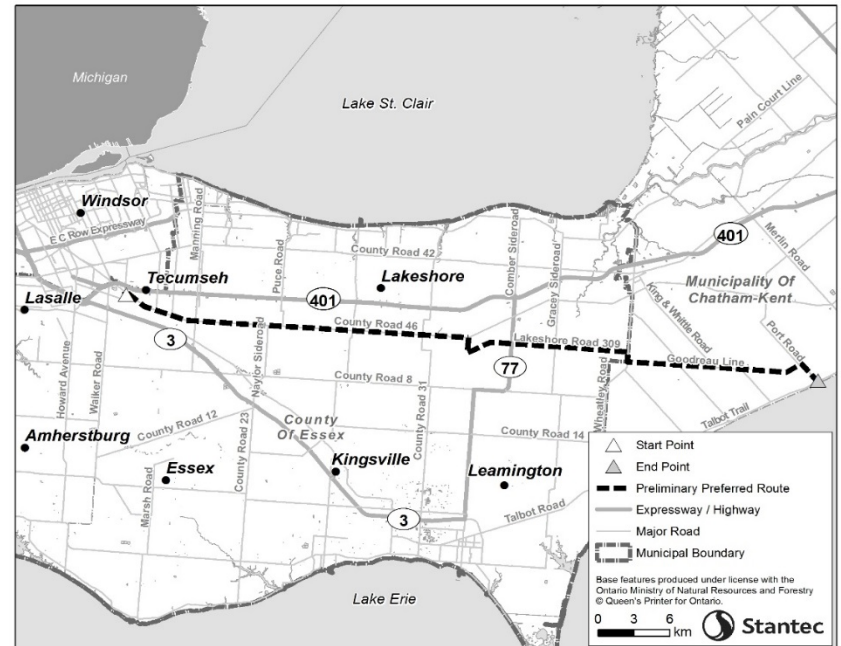

**Thursday, Feb. 21, 2019**  
**4-8 p.m.**

Comber & District Community Centre  
7100 Community Centre Street  
Comber, ON N0P 1J0

## The Grove Hotel wins TripAdvisor award

Owners and staff of The Grove Hotel are celebrating once again after earning more plaudits. This time, TripAdvisor has recognized the uniqueness and charm of The Grove Hotel.

The Grove Hotel, a boutique hotel in Kingsville, Ontario announced today that it has been recognized as a winner in the 'Small Hotels in Canada' category of the 2019 TripAdvisor Travellers' Choice® awards for Hotels, ranking in the TOP 25. Travellers' Choice award winners were determined based on the millions of reviews and opinions collected in a single year from TripAdvisor travellers worldwide. In the 17th year of the awards, TripAdvisor has recognized 7,812 properties in 94 countries and eight regions worldwide.

"We congratulate the properties around the world recognized as the best hotels, which receive our highest honour – Travellers' Choice Hotel awards," said Desirée Fish, Vice President of Global Communications for TripAdvisor. "Winners should be proud of their award as millions of travellers will consider this list when picking the perfect hotel for their needs this year."

This year, the awards celebrate hotel winners in nine categories, including Top Hotels Overall, Luxury, Bargain, Small, Best Service, B&Bs and Inns,

Romance, Family and All-Inclusive. The hallmarks of Travellers' Choice hotels winners are remarkable service, value and quality. For the Grove Hotel and the Town of Kingsville, to be chosen as one of the top 1% of properties in Canada, is an absolutely fantastic accomplishment!

"The historic building at 12 Main Street East was renovated in 2016 to give it a unique and hip vibe – so deserving of this landmark in our community," said Jennifer Flynn, General Manager of 'The Grove Hotel & Brew House'. "We are excited to be able to attract visitors to our property and our community and this award is wonderful recognition of the hard work of many and the significant financial investment of a small group of committed, local owners."

To see TripAdvisor traveller reviews and opinions of THE GROVE HOTEL go to [https://www.tripadvisor.ca/Hotel\\_Review-g499270-d3198051-Reviews-The\\_Grove\\_Hotel-Kingsville\\_Ontario.html](https://www.tripadvisor.ca/Hotel_Review-g499270-d3198051-Reviews-The_Grove_Hotel-Kingsville_Ontario.html)

## Council Okays CWATS Application

By LouAnn Geauvreau-Karry

Kingsville Council decided to approve the endorsement of the 2019 County Wide Transportation System (CWATS) application in order to continue the next phase of the construction of bike paths on County Road 50.

Manager of Municipal Services, Tim Del Greco, presented Council with an update of the 2018 CWATS construction as well as the 2019 application at their regular meeting on January 14th.

He stated that that the paths had been completed on County Road 20 from Dimenna Drive to the Chrysler Greenway, from Whitewood Road to Union Avenue, and Union Avenue to County Road 23. As well, the area on County Road 50 from the Cedar Beach Conservation Area to County Road 23 was also done. He noted that further construction of the paved shoulders from Cedar Beach Conservation Area to 1301 County Road 50 was on hold as the allotted funding for 2018 was insufficient. The new application is needed to complete the work.

The total estimated cost to complete the works from 1301 County Road 50 to Ford Road is \$325,937. The County share is 40% which covers \$130,375. The cost

to the Town of Kingsville is \$195,562.

Councillor Thomas Neufeld made a motion to endorse the application to continue the unfinished portion from the Conservation Area to 1301 County Road 50, saying that the work done so far only completed half of the mandate. Councillor Laura Lucier seconded the motion.

During a discussion of the application, Councillor Tony Gaffan said that he thought that spending the money on roads was more important than bike paths. Councillor Kimberly DeYong suggested that the application be deferred to budget deliberations.

Mayor Nelson Santos stated that in the past Leamington had been criticized for not completing works on bike paths and that putting it off would leave an important heritage route incomplete. He said that the town had signed on to the commitment and he did not want the County to have a reason to back out of their 40% input.

The motion was passed 5-1, with Councillor Gaffan opposed.

According to Del Greco, CWATS is a network of travel facilities for pedestrians and cyclists adjacent to County Roads and includes paved shoulders, bike lanes, signed routes, and multi-use paths.

## Greenhouse expansion approved

By LouAnn Geauvreau-Karry

Capogna Flowers Inc. was given the green light to replace the three-phase planned expansion of their greenhouse to a revised two-phase plan.

In 2013 the applicant received approval of a three-phase project, but they did not proceed with those plans.

The new layout proposed is for a two-phase project to develop up to 7.9 acres of greenhouse.

According to the Manager of Planning Services, Robert Brown, phase 1 will entail the construction of 4.75 acres of greenhouse, a 12,600 square foot warehouse, and a boiler room of over 12,000 square feet.

The warehouse will contain a new office space on the main level with a new bunkhouse area located above that. The second phase will add 3.15 acres of greenhouse. An expanded parking area will also be required.

Brown said that much of the new greenhouse space is actually replacing outdoor production area with new indoor space rather than an increase in overall production on the site.

The applicant has indicated that no grow lighting will be used in the new greenhouse, but the site plan agreement will still contain lighting provisions should that change.

Brown said that the plan approval will result in building permit fees, development charges, and an increase in assessment once construction of each phase is completed.

He recommended that Council approve the site plan amendment for the new two-phased addition to the greenhouse operation.

Councillor Thomas Neufeld made a motion to that effect. Seconded by Councillor Laura Lucier, the motion was passed.

## HELP WANTED

HELP WANTED: Aphria Inc. is looking for Greenhouse Production Associates to join their team. Duties include daily crop maintenance, harvesting, crop rotation, inventory counts, and cleaning of greenhouse. No public transportation available. Located in Leamington, ON. Compensation starts at \$14.00/hour. Full time hours Monday through Friday. Please apply at careers@aphria.com or mail resume to P.O. Box 20009 269 Erie St. S. Leamington, ON N8H 3C4. 9-11th

## REAL ESTATE

Buying or selling a farm? Do you know the right questions and answers? Farm Experienced Realtor Carl Idzinski, Real Choice Realty. 519-817-8891. 1-11th

## WANTED

CASH PAID for scrap cars and trucks. Free removal. Please phone: 519-776-1361 or 519-791-5046. 46-1

## WANTED

CASH PAID for antiques, costume jewellery, furniture, gold, sterling, coins, tools, complete estates. We take it all! Free appraisals. Call 519-727-8894. 1-11th

## PERSONAL

NOVENA: O Holy St. Jude! Apostle and Martyr, great in virtue and rich in miracles, near kinsman of Jesus Christ, faithful intercessor of all who invoke your special patronage in time of need; to you I have recourse from the depth of my heart, and humbly beg, to whom God has given such great power, to come to my assistance; help me in my present urgent petition. In return I promise to make your name known and cause you to be invoked. Say (3) Our fathers (3) Hail Mary's (3) Glory Be's. St. Jude pray for us and all who invoke your aid. Amen. Must be said for 9 consecutive days. This Novena has never been known to fail. I have had my request granted. Publication must be promised. With Grateful thanks J.B.

# Council learns about the discretionary fund and procurement policy

by Sylene Argent

During a special meeting on Monday evening, Essex Council learned about the Town's Procurement Policy and the Council Discretionary Fund.

Jackson Tang, Assistant Manager of Business Services, introduced Council to the Procurement Bylaw and Policy.

The function of this Bylaw, he said, is to provide guidelines for buying goods and services efficiently and effectively, and in a fair,

non-discriminating, and transparent way.

When dealing with this Bylaw, he noted, consideration of environmental, economic and financial, and social impacts are considered.

When Council members make decisions on procurement issues, Tang said, it is important to note, they are spending taxpayers' money. Therefore, it is important to be fair.

The Fundamental Principles of procurement, he noted,

provide Essex with goods and services in the right quality, price, quantity, place, and source, and at the right time.

He also defined the differences between Request for Proposal, a Request for Tender, and a Request for Quotation, etc. Tang also explained the thresholds of costs associated to tenders and the appropriate method of obtaining those quotes.

A segment of the presentation spoke about comparing tenders when it comes to varying offers for prices. He also discussed the benefits of putting in construction

tenders early in the year.

Current trends include electronic tendering and group purchases with other municipalities or broader public sector organizations, he noted.

Jeffrey Morrison, Director of Corporate Services and Treasurer, then provided information about the Council Discretionary Fund, which provides members of Council with a funding mechanism to assist community organizations whose mandate furthers Council's priorities for the community.

## ENBRIDGE GAS WINDSOR PIPELINE REPLACEMENT PROJECT Information Session

You are invited to attend an Information Session for the proposed Windsor Pipeline Replacement Project.

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline.

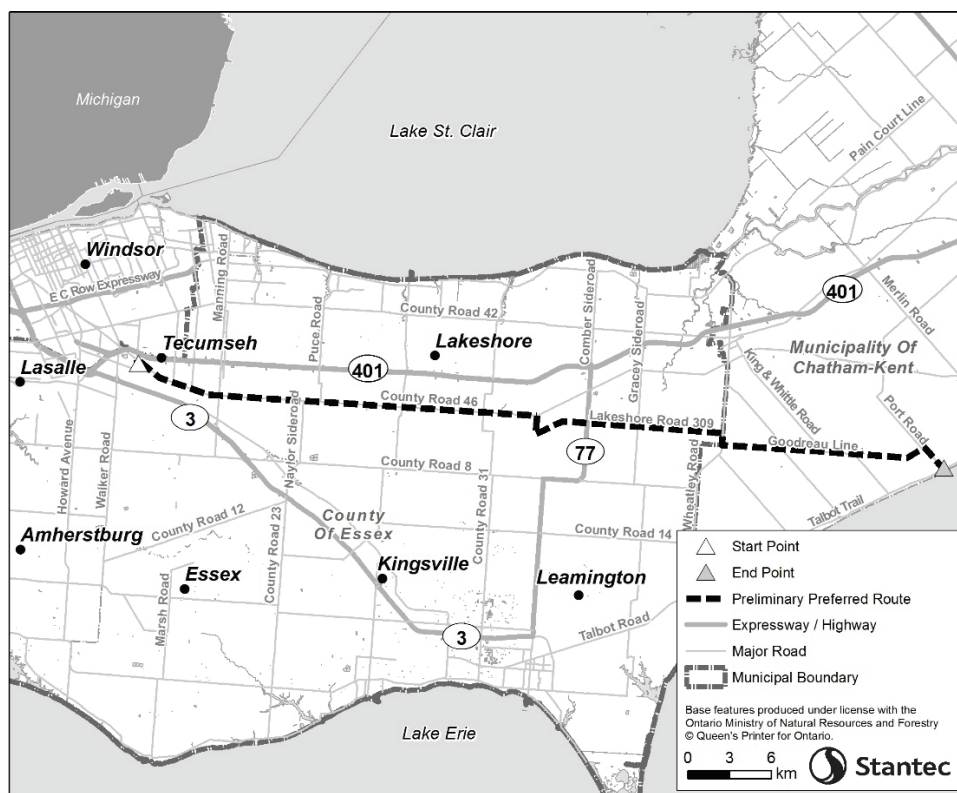

The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

An integral part of this project is the completion of an environmental study of the construction and operation of the proposed pipeline and related facilities by an independent environmental consultant, Stantec Consulting Ltd. (Stantec). Stantec is hosting an Information Session to provide those interested in the project an opportunity to review the project and provide input to the planning process. The Information Session will be conducted as a drop-in centre, with representatives from both Enbridge Gas and Stantec available to receive comments and answer questions.

The Information Session will be held at the following time and location:

**Wednesday, Feb. 20, 2019**  
**4-8 p.m.**  
Ciociaro Club of Windsor  
3745 North Talbot Road  
Oldcastle, ON N0R 1L0

**Thursday, Feb. 21, 2019**  
**4-8 p.m.**  
Comber & District Community Centre  
7100 Community Centre Street  
Comber, ON N0P 1J0

If you cannot attend the Information Session but would like learn more, please contact:

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

*APPENDIX B4:  
DISPLAY BOARDS, NEWSLETTER AND  
EXIT QUESTIONNAIRE*

# Windsor Pipeline Replacement Project Information Session

## Welcome

Please view the display boards, speak to members of Enbridge Gas Inc. (Enbridge Gas) and/or Stantec Consulting Ltd. (Stantec), and complete a questionnaire providing your feedback.

Sign up at the front desk to have your attendance recorded as part of the environmental study and to receive future project updates. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

## Our commitment

Enbridge Gas is committed to involving community members in this proposed project. We are dedicated to providing you with up-to-date information in an open, honest and respectful manner and will carefully consider your input.

Enbridge Gas provides safe and reliable delivery of natural gas to more than 3.5 million residential, commercial, and industrial customers across Ontario. Enbridge Gas is committed to environmental stewardship and conducts all of its operations in an environmentally responsible manner.

# Windsor Pipeline Replacement Project Information Session

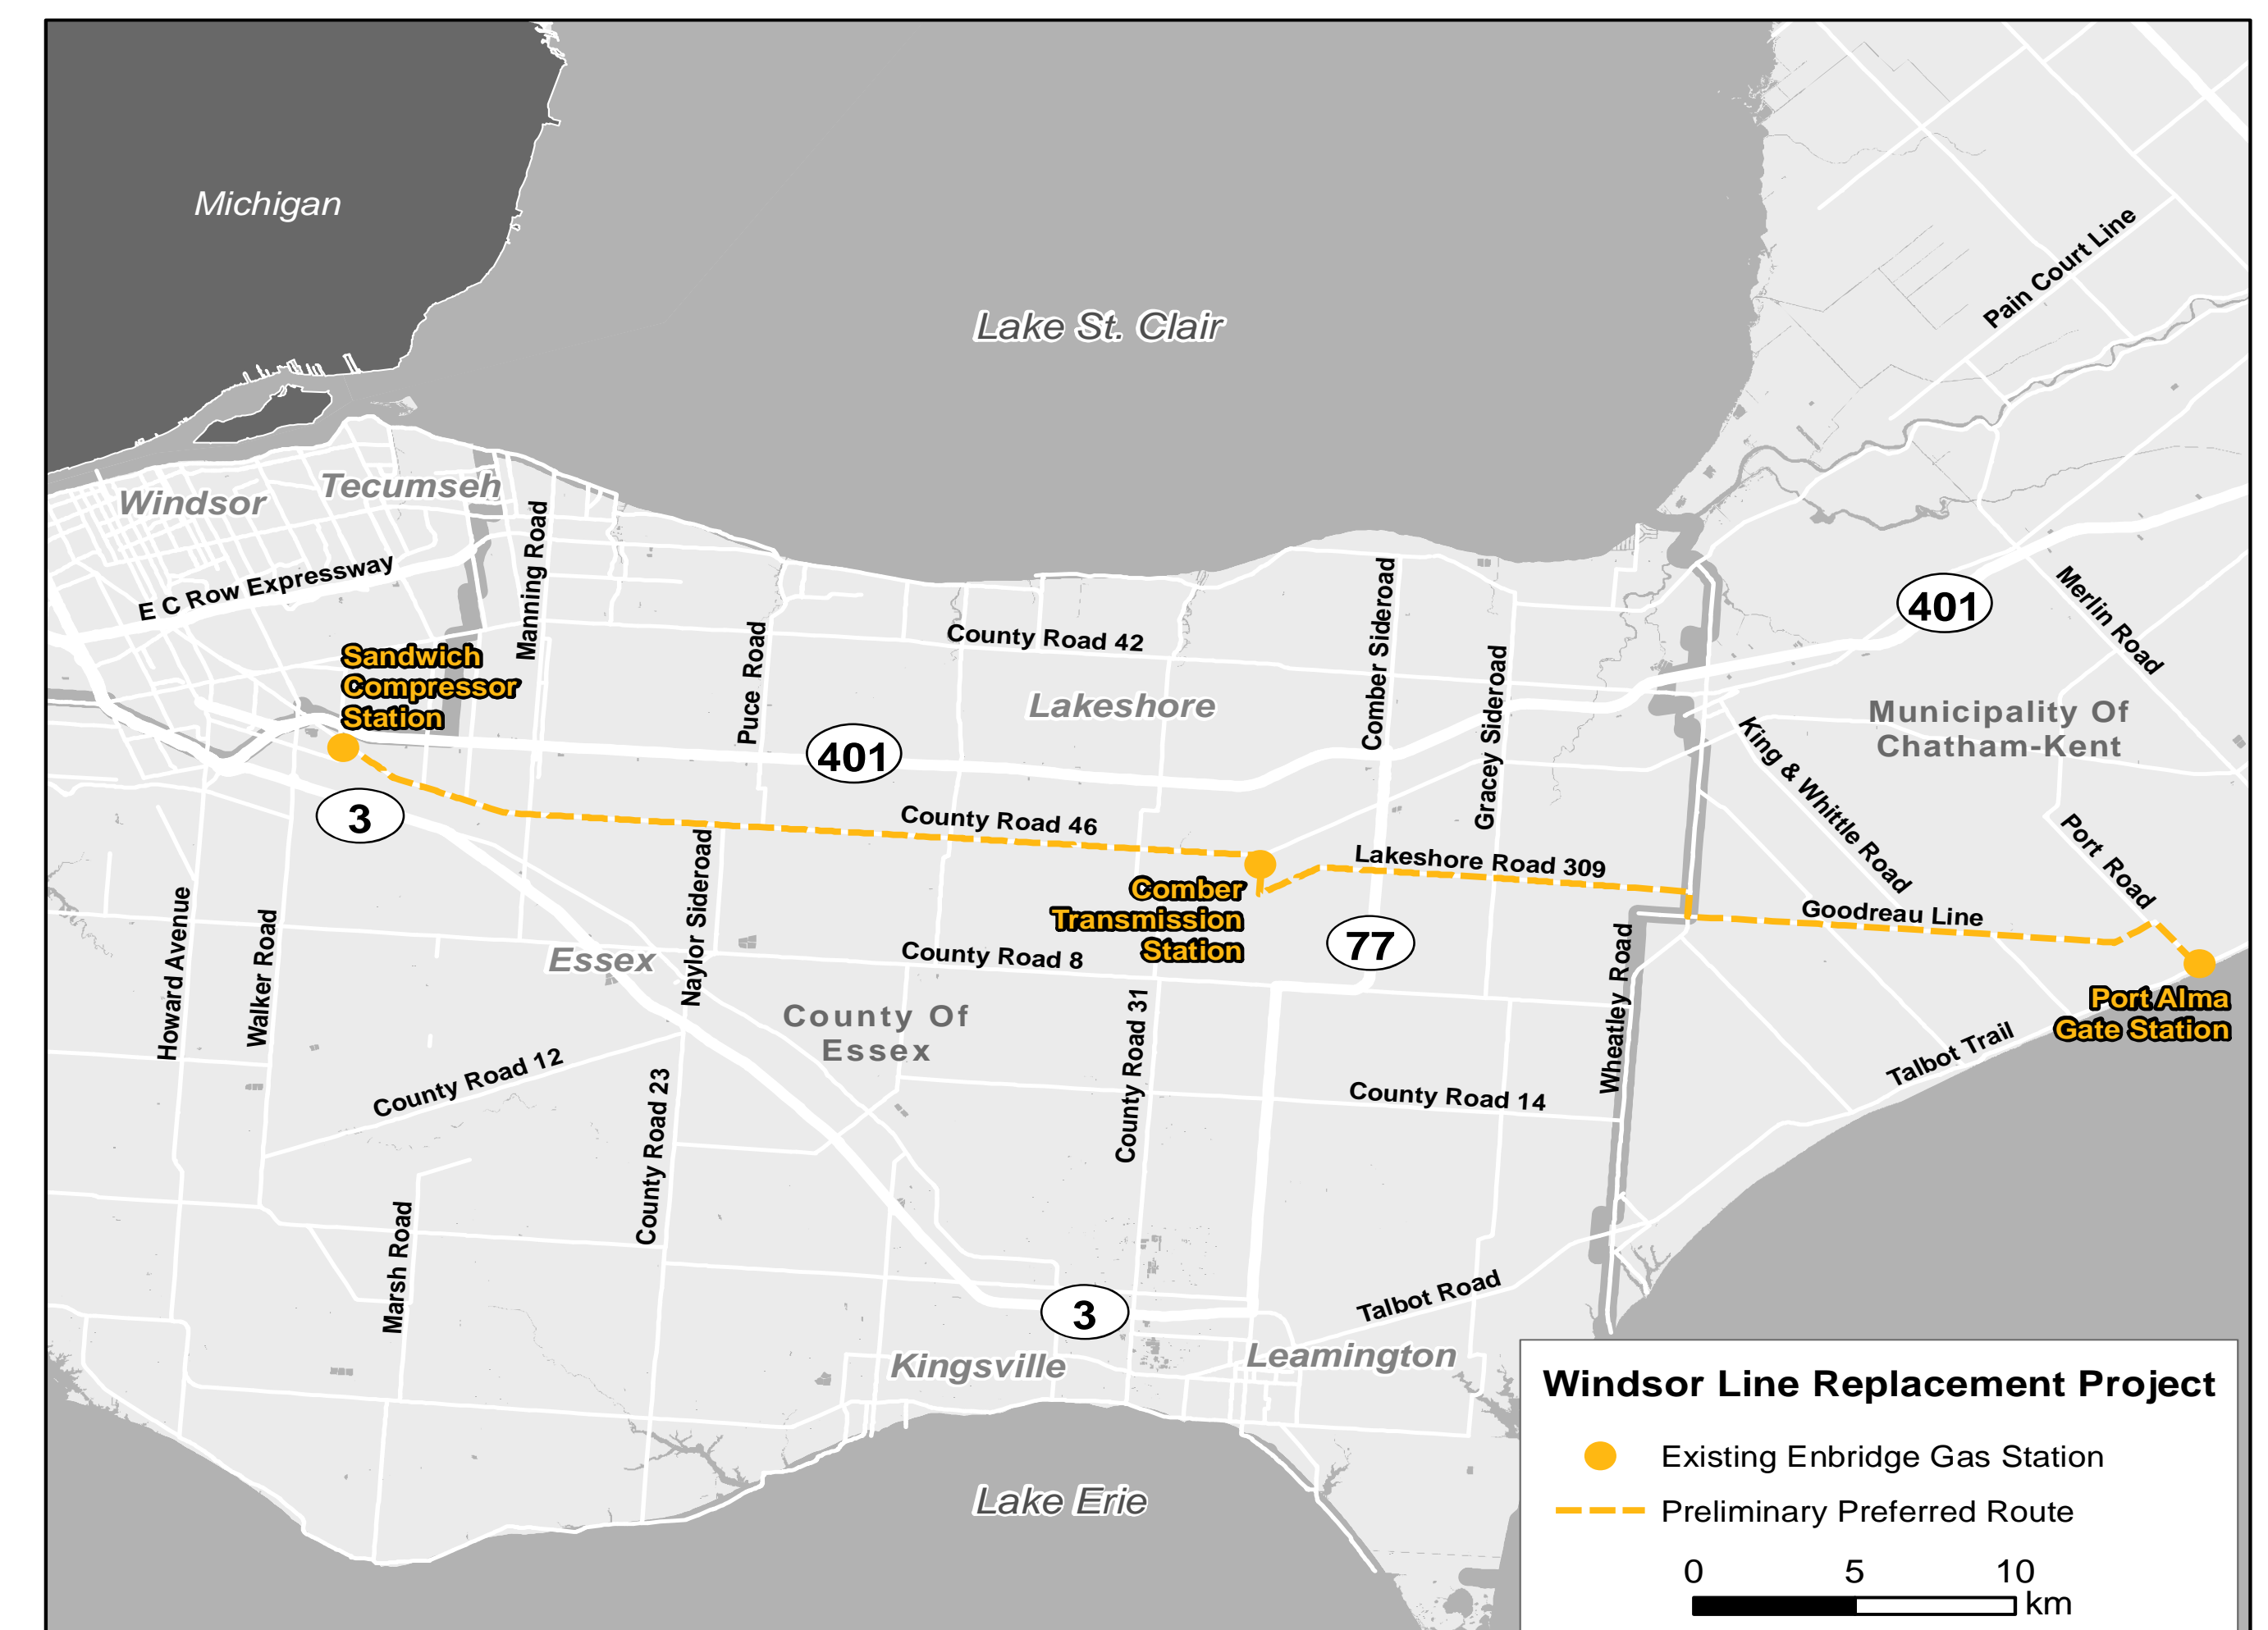

## Project overview

The proposed project involves replacing approximately 60 km of the existing Windsor natural gas pipeline, an 8 to 10-inch diameter pipeline, with a new 6-inch diameter pipeline to be constructed in the vicinity of the existing pipeline.

The proposed project will occur between the existing Enbridge Gas Sandwich Compressor Station (located in the Town of Tecumseh) and the existing Enbridge Gas Port Alma Transmission Station (located in the Municipality of Chatham-Kent).

If approved by the Ontario Energy Board (OEB), construction of the proposed pipeline project is planned to begin as early as spring/summer 2020.

# Windsor Pipeline Replacement Project Information Session

Why is Enbridge Gas undertaking this project?

Enbridge Gas is undertaking the proposed project as part of our continual pipeline monitoring and integrity program.

# Windsor Pipeline Replacement Project Information Session

## Environmental study process

The environmental study and subsequent Environmental Report for the project will be completed as per the OEB's *"Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)."*

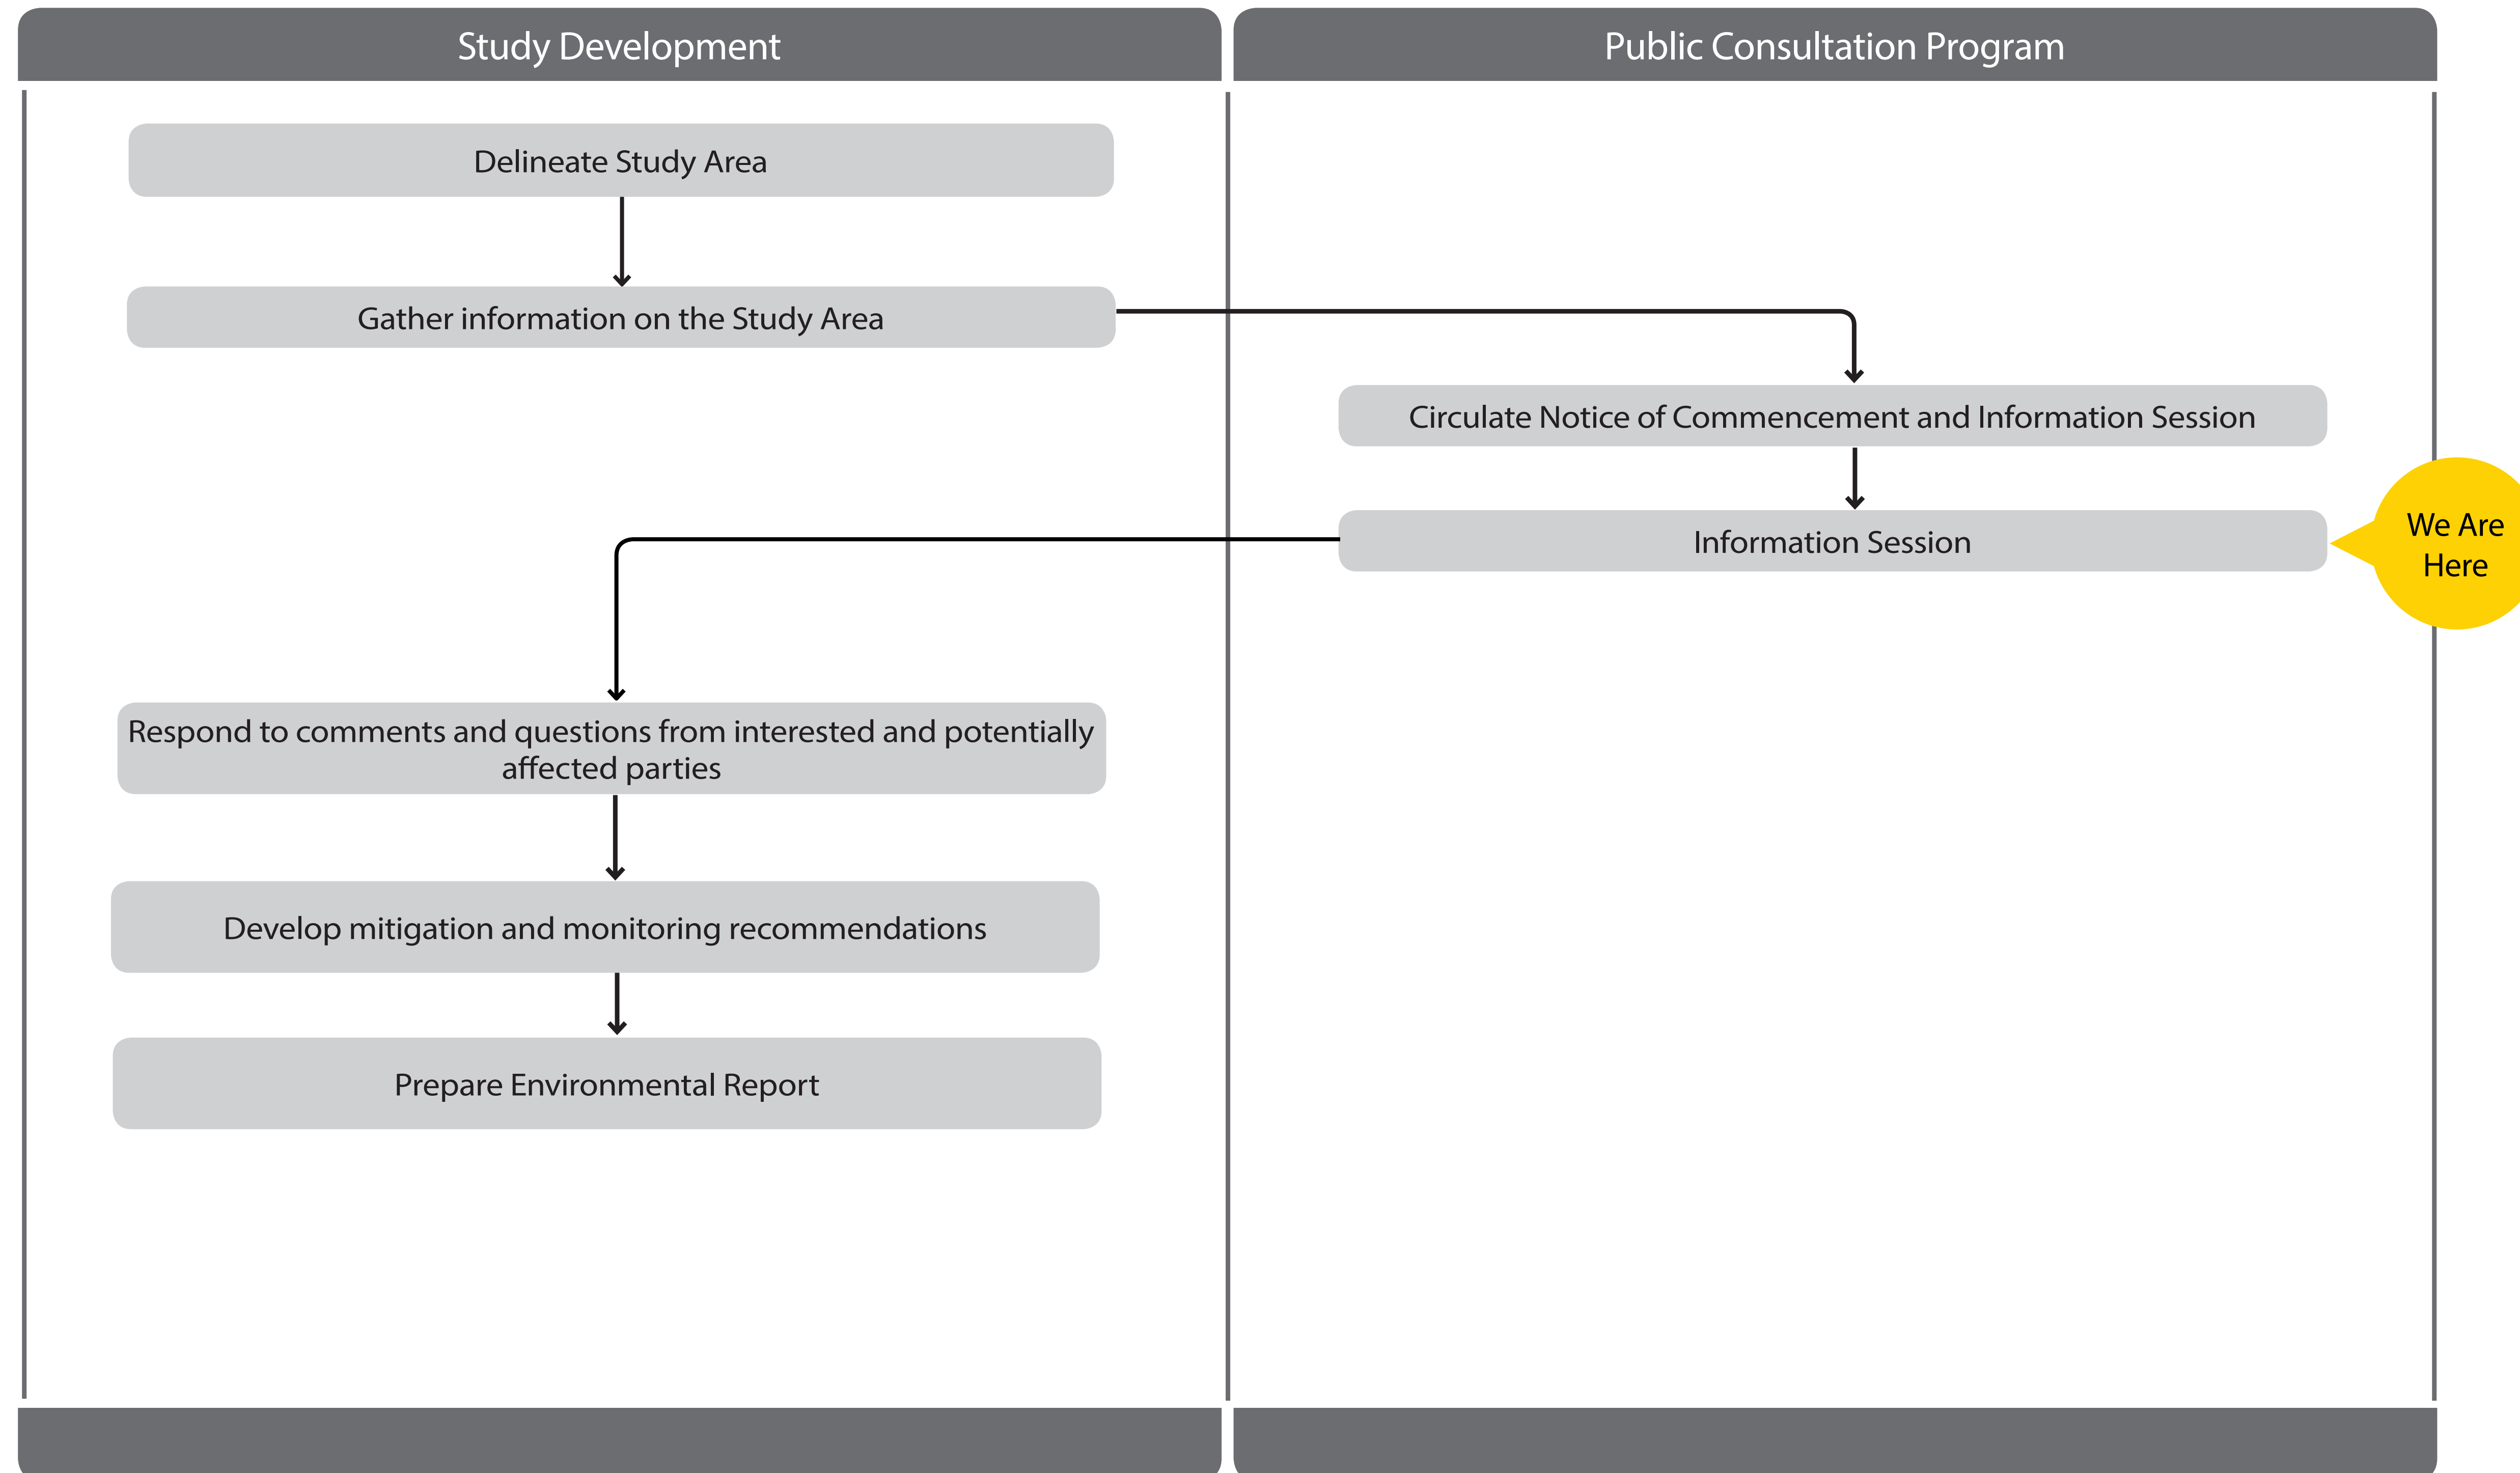

The study will:

- Undertake consultation to understand the views of interested and potentially affected parties.
- Consult with Indigenous Communities to understand interests and potential impacts.
- Be conducted during the earliest phase of the project.
- Identify potential impacts of the project.
- Develop environmental mitigation and protective measures to avoid or minimize potential impacts.
- Develop an appropriate environmental inspection, monitoring and follow-up program.

# Windsor Pipeline Replacement Project Information Session

# Windsor Pipeline Replacement Project Information Session

## Ontario Energy Board (OEB) review and approval process

The OEB is the body that regulates the natural gas industry in Ontario, in the public interest.

Enbridge Gas plans to submit an application for this project to the OEB. This application will include comprehensive information on the project including:

- The need for the project.
- Facility alternatives.
- Project costs and economics.
- Pipeline design and construction.

- Environmental mitigation measures.
- Land requirements.
- Consultation with Indigenous Communities.

The OEB will then hold a public hearing to review the project.

If after this review the OEB determines that the project is in the public interest it will approve construction of the project.

Additional information about the OEB process can be found on the project newsletter and at: [www.ontarioenergyboard.ca](http://www.ontarioenergyboard.ca)

# Windsor Pipeline Replacement Project Information Session

## Preliminary preferred alternative

Following a detailed review, Enbridge Gas determined the optimal approach was to replace the existing 8 to 10-inch diameter pipeline with a new 6-inch diameter pipeline.

The benefits of replacing the existing 8 to 10-inch diameter pipeline in a new alignment within the existing road allowance include:

- Maintaining gas service to existing customers throughout construction.
- Less disturbance to private lands related to pipeline maintenance.
- Improved safety for both the public and workers during construction.
- Minimizing environmental impacts by:
  - Reducing the footprint by remaining primarily within the existing road allowances.
  - Reducing impacts by minimizing disturbance to adjacent natural features and agricultural land.

# Windsor Pipeline Replacement Project Information Session

## Access and land requirements

Representatives from Enbridge Gas will meet with directly affected landowners along the pipeline route to discuss land rights which are necessary for the removal of the existing pipeline and construction of the new pipeline.

The compensation offered for both the construction of the new pipeline and removal of the existing pipeline where applicable will include a component for land rights, disturbance and a payment for crop loss.

# Windsor Pipeline Replacement Project Information Session

## Pipeline removal and abandonment

Pipeline removal and abandonment will be completed in accordance with Canadian Standards Association (CSA) Z662 Standards.

Enbridge Gas intends to remove the existing pipeline from private lands, where practicable. Where removal is not practicable, the existing pipe will be abandoned in place. Determination between pipeline removal and abandonment will consider the following:

- Landowner preference.
- Road crossings.
- Stream crossings.
- Depth of cover.
- Environmental considerations.
- Landscaping, driveways, etc.

# Windsor Pipeline Replacement Project Information Session

## Your Enbridge Gas system connection and this project

This project will see an existing pipeline decommissioned and a new pipeline installed. Decommissioning will be completed in accordance with CSA Z662 Standards.

Currently there are approximately 450 properties along the proposed project route that are directly connected to the existing pipeline. If you are one of these properties, representatives from Enbridge Gas will work with you

to ensure a smooth transition of your service to the new pipeline, which will involve a temporary gas service outage and subsequent appliance re-light.

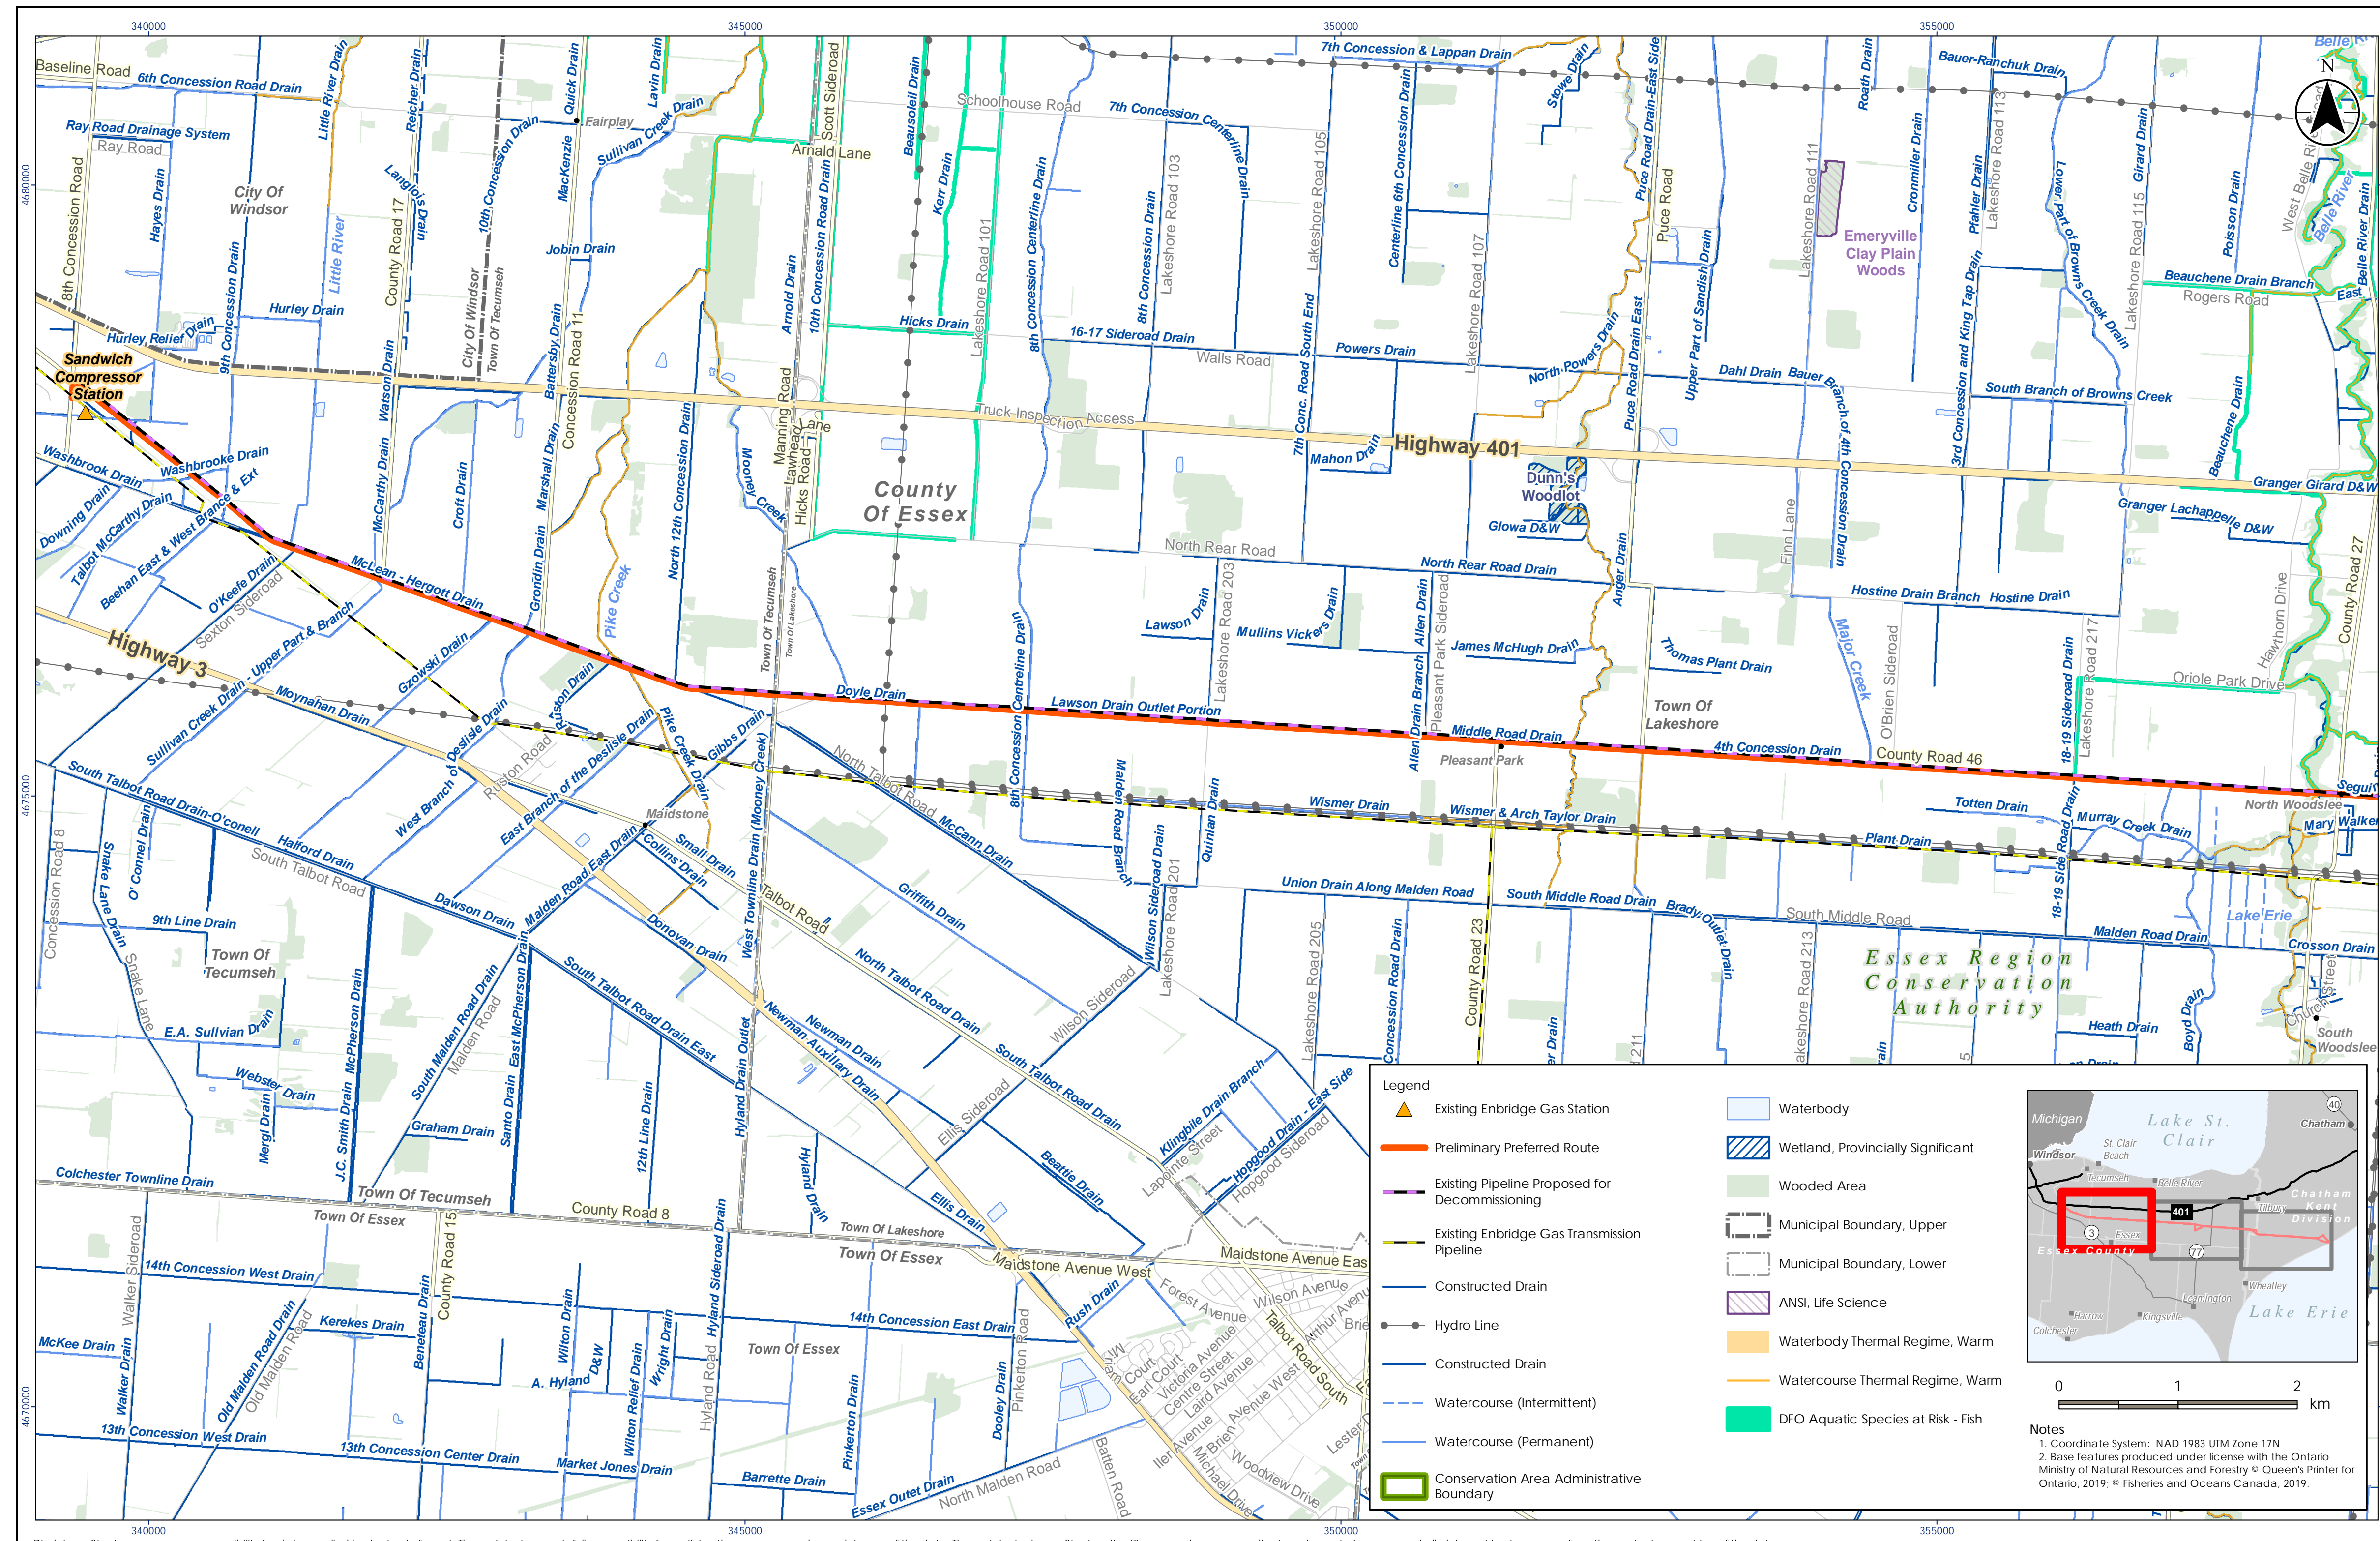

Other property impacts during construction, such as the need to cross driveways, will be managed with you to ensure you maintain access to your property.

# Windsor Pipeline Replacement Project Information Session

## Existing features along the preliminary preferred route

The recipient releases Stantec, its officers, employees, consultants and agents, from any and all claims arising in any way from the content or provision of the data.

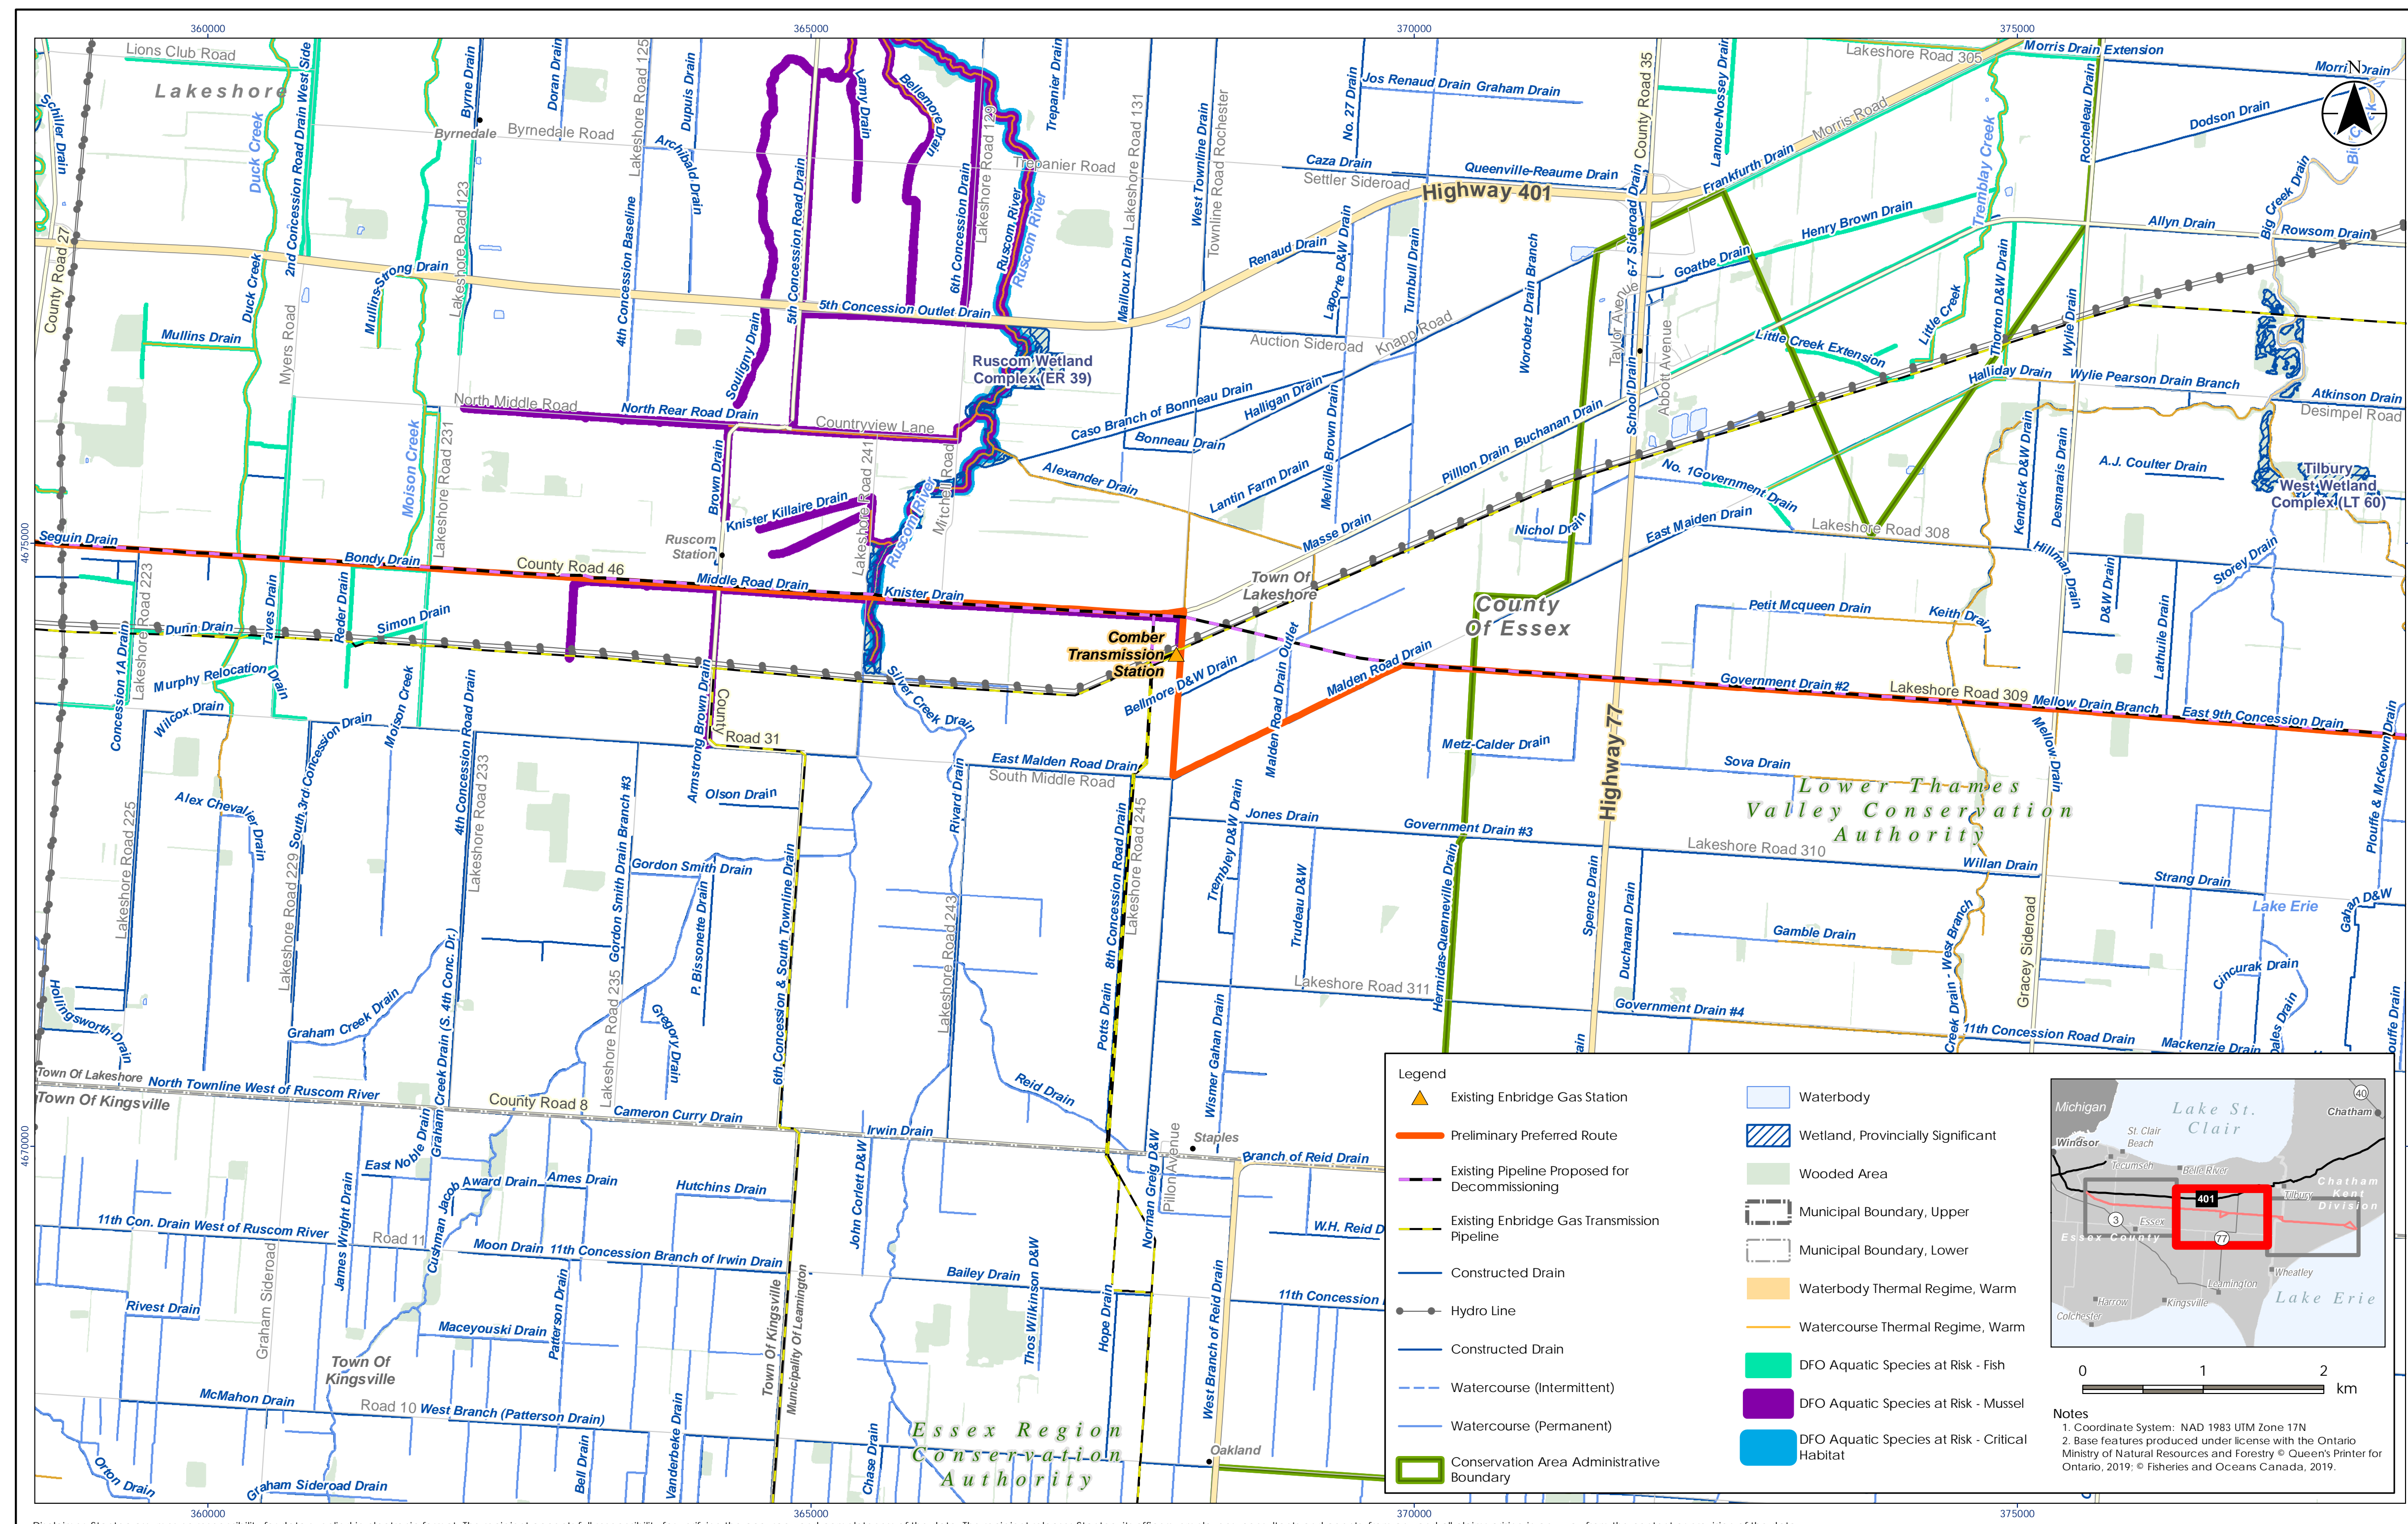

# Windsor Pipeline Replacement Project Information Session

## Agricultural land

The preliminary preferred route is primarily in existing road allowances; however, agricultural lands adjacent to the road right-of-way may be impacted along the route to facilitate the construction process.

Enbridge Gas has established and tested measures to preserve the integrity of agricultural lands throughout the construction phase:

- Enbridge Gas will implement a wet soil shutdown protocol on agricultural lands to minimize soil structure damage.
- If work occurs on agricultural lands, Enbridge Gas will implement appropriate cleanup and restoration.

- Any agricultural drainage and tiling systems impacted by construction will be repaired.

Tile will be temporarily re-routed where required to ensure proper drainage during construction.

Damage and severed drains will be repaired following construction. After repair and prior to backfilling, landowners will be invited to inspect and approve the repair. Any on-going concerns with tile repair will be addressed by Enbridge Gas.

# Windsor Pipeline Replacement Project Information Session

## Socio-economic features

The preliminary preferred route is primarily in existing road allowances.

### Potential effects

- Temporary increases in noise, dust and air emissions.
- Increased construction traffic volumes.
- Temporary impairment of the use and enjoyment of property.
- Vegetation clearing along the pipeline easement (if needed).
- Temporary traffic restrictions and lane closures.
- Coordination, inspection of natural gas service to customers during the tie-over from the existing Windsor Pipeline to the new replacement.

### Example mitigation measures

- Provide access across the construction area.
- Restrict construction to daylight hours, and adhere to applicable noise by-laws when possible.
- Develop and implement a Traffic Control Plan.
- Place fencing at appropriate locations for safety.
- Implement a water well monitoring program.
- Providing you contact to an Enbridge Gas representative who is available prior to and throughout construction.
- Dust control measures.
- Re-vegetation of cleared areas (seeding/planting).

# Windsor Pipeline Replacement Project Information Session

## Aquatic resources

Enbridge Gas understands the importance of protecting wildlife during construction and therefore will implement recognized mitigation measures to minimize possible environmental effects.

The pipeline crosses 25 known watercourses.

### Potential effects

- Disruption and alteration to aquatic species and habitat and/or nuisance effects.
- Increased erosion, sedimentation, and turbidity resulting from removal of vegetation.

### Example mitigation measures

- Conduct surveys of waterbodies.
- Obtain all agency permits and approvals.

- Limit in-channel construction, where possible, and conform to fish timing window guidelines.
- For in-channel construction, protect aquatic species and manage sedimentation and turbidity.
- Restore and seed areas to establish habitat and reduce erosion.
- Replant riparian vegetation.

# Windsor Pipeline Replacement Project Information Session

## Cultural heritage resources

During the course of construction, cultural heritage features such as archaeological finds, buildings, fences and landscapes may be encountered. Detailed field surveys will be conducted by independent, third-party archaeologists and cultural heritage professionals.

### Potential effects

- Damage or destruction of archaeological, paleontological or historical resources.

### Example mitigation measures

- Archaeological assessment of the construction right-of-way, with review and comment from the Ministry of Tourism, Culture and Sport (MTCS).

- Cultural heritage assessment (for built heritage features and cultural heritage landscapes) of the construction right-of-way, with review and comment from MTCS.
- Reporting of any previously unknown archaeological, paleontological or historical resources uncovered, or suspected of being uncovered, during excavation.

# Windsor Pipeline Replacement Project Information Session

## Terrestrial resources

During the course of construction, natural heritage features such as wildlife habitat and vegetated areas will need to be crossed.

### Potential effects

- Damage or removal of vegetation and wildlife habitat adjacent to the construction area.
- Disturbance and/or mortality to local wildlife.

### Example mitigation measures

- Conduct surveys (including Species at Risk surveys) in advance of construction to determine opportunities for wildlife habitat to exist.

- Clearly mark the construction area to avoid accidental damage.
- Restore and seed areas to establish habitat and reduce erosion.
- Secure any necessary permits, and follow any conditions of approval.

# Windsor Pipeline Replacement Project Information Session

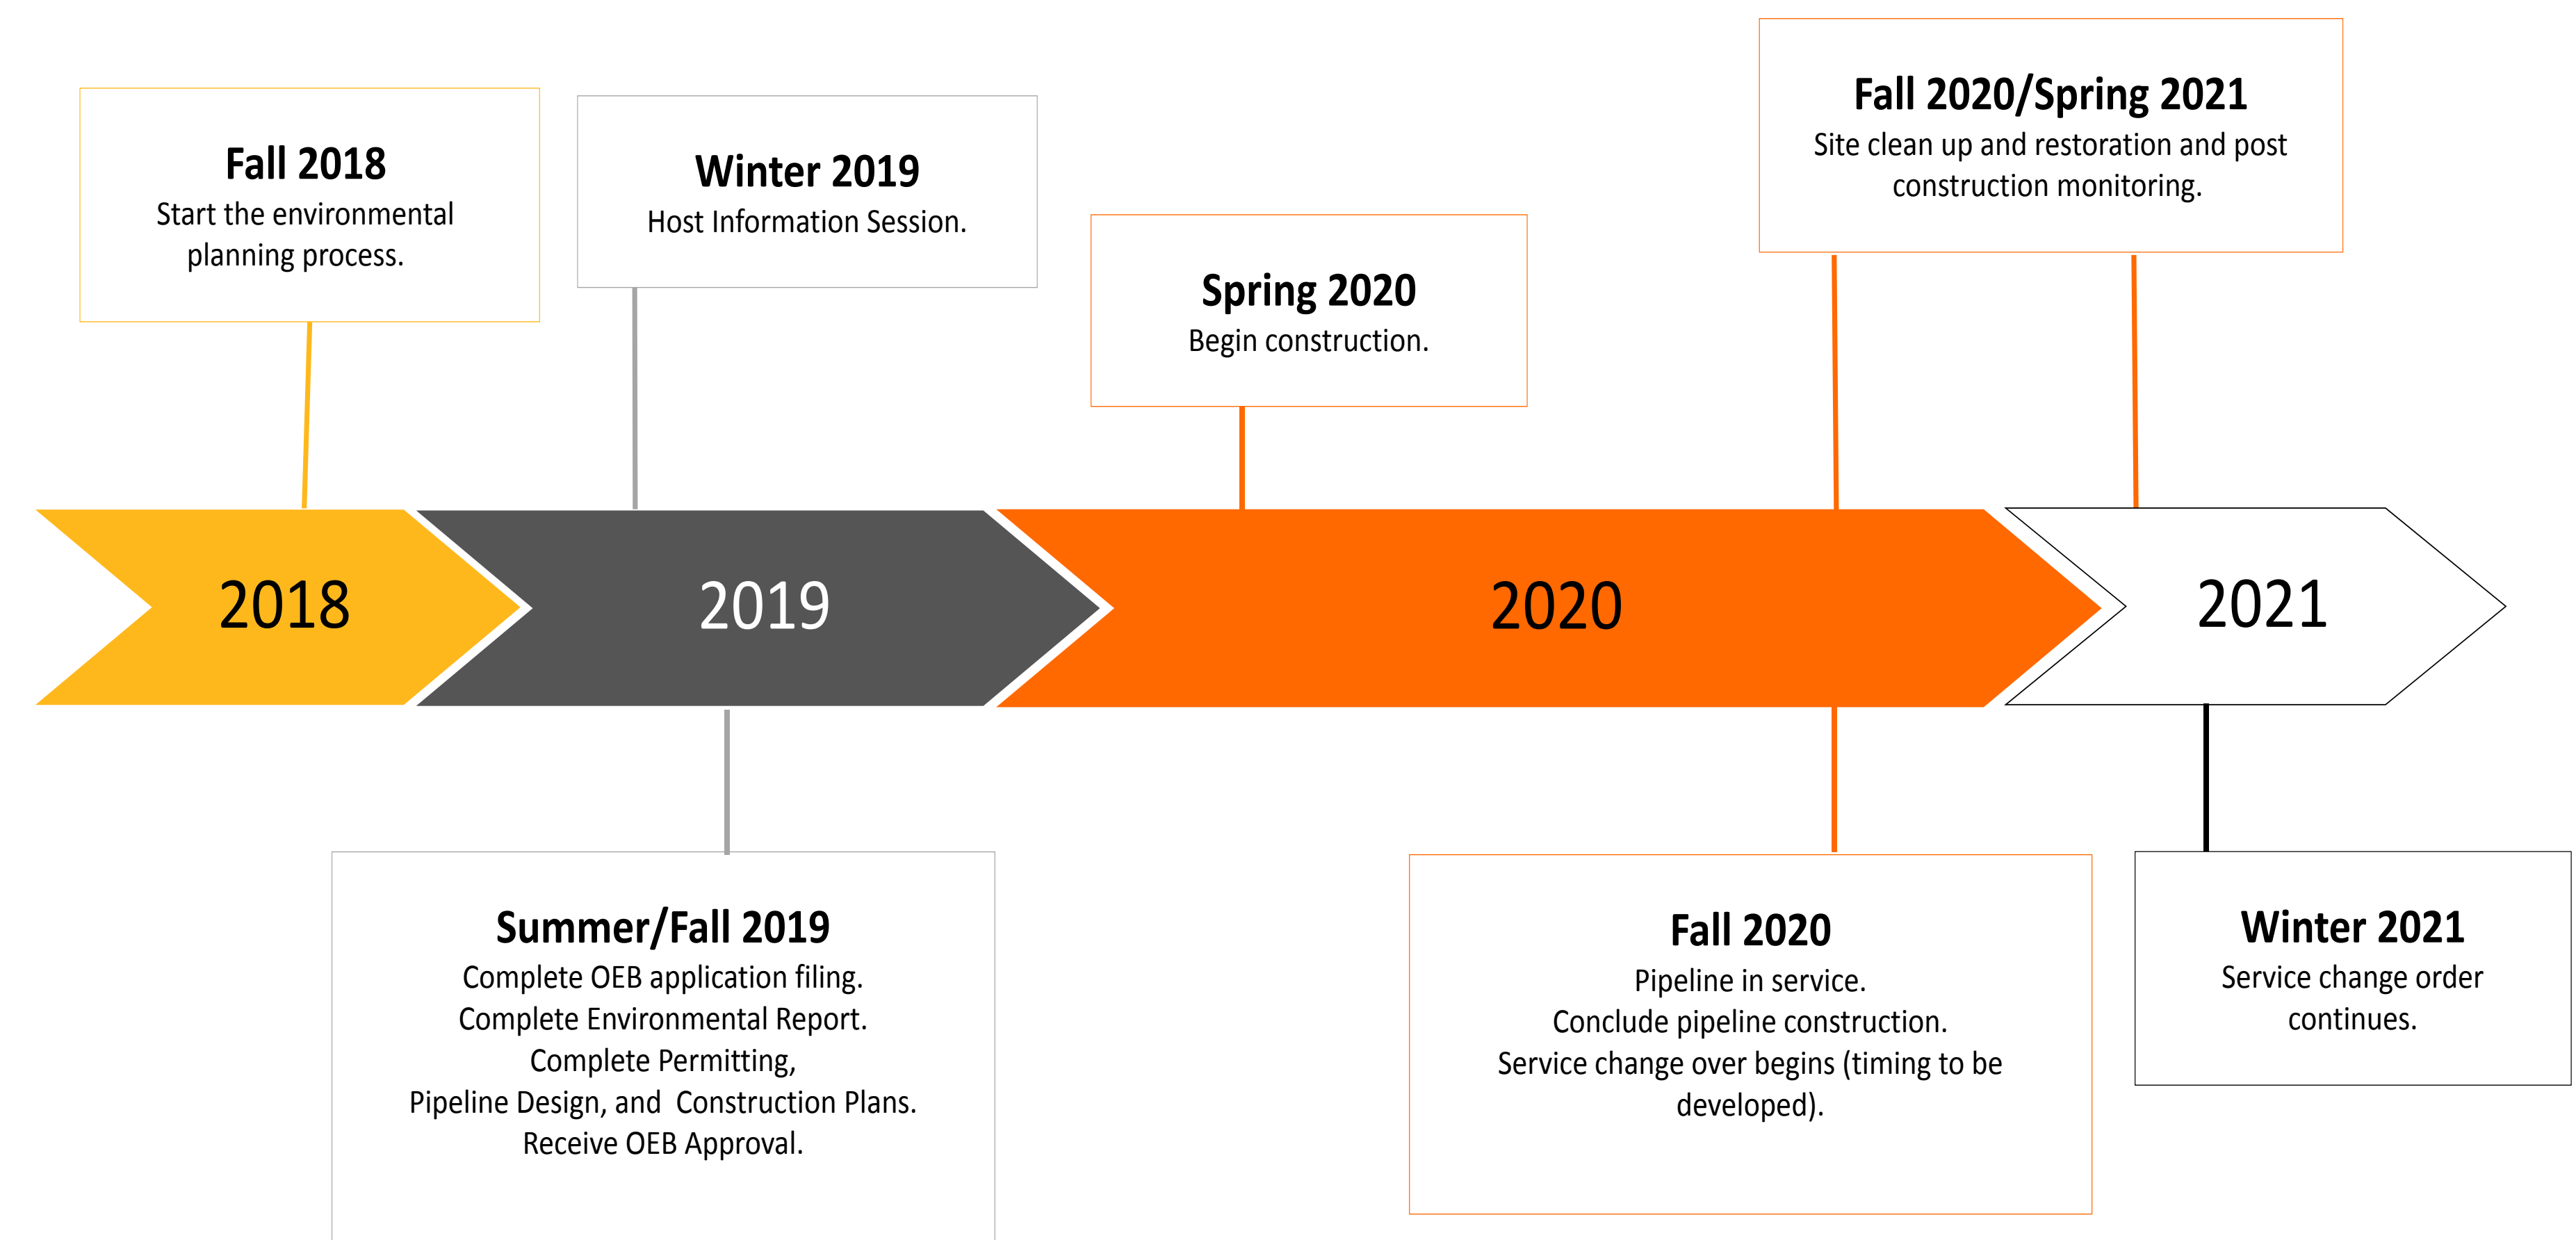

## Next steps

Serving hundreds of communities in Ontario, we consider ourselves strong community partners who believe in and are committed to public consultation.

During the planning stages for this project we have consulted and will continue to consult with local landowners, Indigenous communities, government agencies and other interested parties that could be impacted by the Project.

After this Information Session, we intend to pursue the following schedule of activities:

# Windsor Pipeline Replacement Project Information Session

## Thank you!

On behalf of the Project Team, thank you for attending this Information Session. We appreciate your involvement in the consultation process, and we would like to hear from you.

Please fill out the Exit Questionnaire. If you have any further comments or questions, please contact:

# Enbridge Gas Inc. Windsor Pipeline Replacement Project: Information Newsletter

## Project Overview

The proposed project involves replacing approximately 60 km of the existing Windsor natural gas pipeline, an 8 to 10-inch diameter pipeline, with a new 6-inch diameter pipeline to be constructed in the vicinity of the existing pipeline.

The proposed project will occur between the existing Enbridge Gas Sandwich Compressor Station (located in the Town of Tecumseh) and the existing Enbridge Gas Port Alma Transmission Station (located in the Municipality of Chatham-Kent).

If approved by the Ontario Energy Board (OEB), construction of the proposed pipeline project is planned to begin as early as spring/summer 2020.

## Why is Enbridge Gas undertaking this Project?

Enbridge Gas is undertaking the proposed project as part of our continual pipeline monitoring and integrity program

Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.

## Ontario Energy Board Review and Approval Process

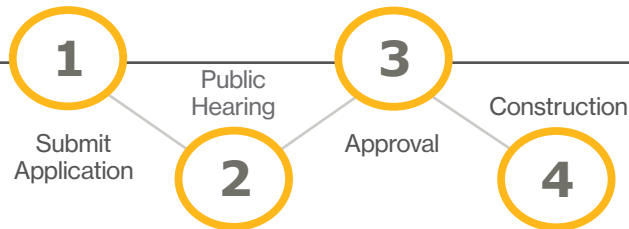

The Ontario Energy Board (OEB) is the body that regulates the natural gas industry in Ontario, in the public's interest. The OEB's approval is required before this pipeline can be constructed.

Enbridge Gas plans to submit an application for this project to the OEB, whose review and approval is needed before this project can proceed. This application will include comprehensive information on the project including: the need for the project, facility alternatives, project costs and economics, pipeline design and construction, environmental mitigation measures, land requirements, and consultation with Indigenous Communities.

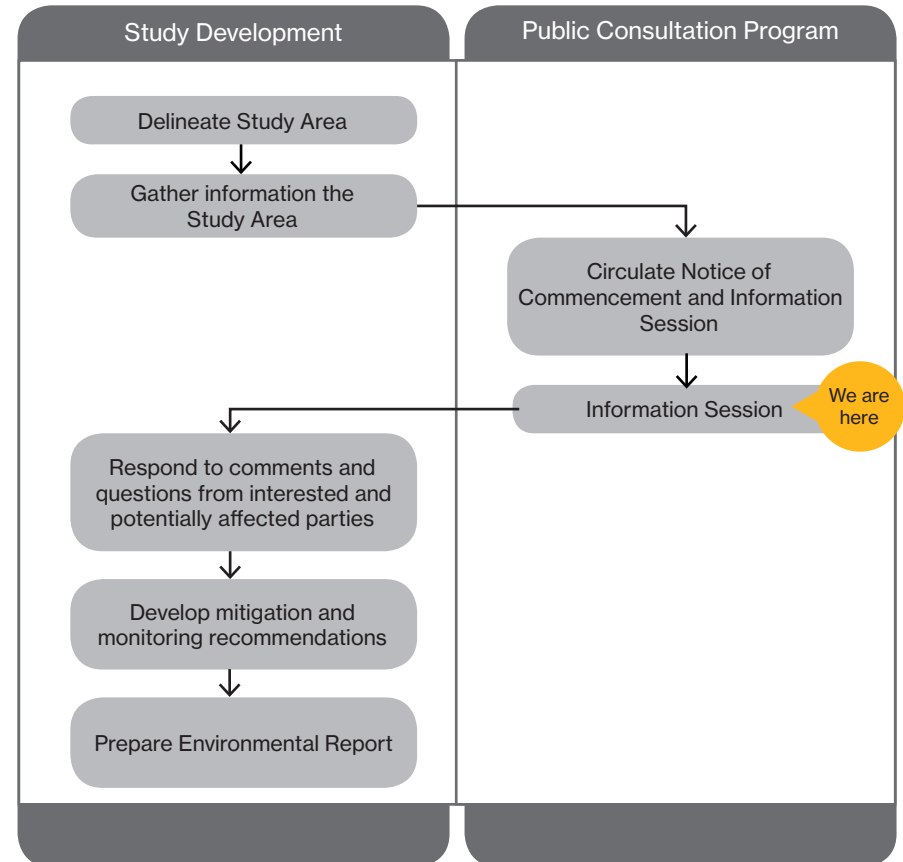

The OEB will then hold a public hearing to review the project. This will include notices in local newspapers, letters to directly affected landowners, the opportunity for the general public and landowners to submit questions regarding the project, a formal hearing, and a written decision regarding the project.

If after this review the OEB determines that the project is in the public's interest it will approve construction of the project. The OEB normally attaches conditions to the approval which Enbridge Gas will comply with during the construction and restoration process.

Additional information about the OEB process and information about how to participate in the OEB hearing process can be found at: [www.ontarioenergyboard.ca](http://www.ontarioenergyboard.ca)

## Environmental Study Process

## Thank You!

On behalf of the Project Team, thank you for your interest in this project. We appreciate your involvement.

If you have any comments or questions please contact:

*APPENDIX B5:  
PROJECT CORRESPONDENCE*

**Enbridge Gas - Windsor Pipeline Replacement Project**  
**Correspondence Tracking**  
**Public, Landowners and Businesses**

Comment Number	Stakeholder Group	Method of Communication	Date of Correspondence	Summary of Comment	Date Response Provided	Summary of Response
1	Ontario Woodlot Association	Email - Outgoing	1-Feb-19	Stantec sent the Notice of Information Sessions for the Windsor Pipeline Replacement Project		
2	Member of the Public	Mail out	1-Feb-19	Stantec sent the Notice of Information Sessions for the Windsor Pipeline Replacement Project		
3	Member of the Public	Email - Incoming	9-Feb-19	Member of the public requested information on the existing route and if the pipeline will be north of south of their location.	11-Feb-19	Stantec replied that it will be on the north side, pending final input from the municipality and attached a map of the route.
4	Member of the Public	Email - Incoming	11-Feb-19	Member of the public requested a map or description of the existing route.	11-Feb-19	Stantec replied that the proposed pipeline route generally follows the existing pipeline with the exception of where the existing pipeline crosses agricultural fields. We are working on more detailed mapping that will be presented at the open house.
5	Member of the Public	E-mail Incoming	11-Feb-19	Member of the public requested information regarding the projects affect on their property.	13-Feb-19	The proposed pipeline is tentatively located within the road allowance on the north side of Lakeshore 309, this is still pending final input from the municipality. There will be construction activities approximately one to two weeks in front of the property and any construction impacts would be repaired after the pipeline installation is complete. Additional construction may follow one year after construction associate with the removal or abandonment of the pipeline.
	Member of the Public	E-mail Incoming	18-Feb-19	Member of the public received the notice of the project but are unable to attended. Can you let us know if the new pipeline is on North or South side of County Rd 26 in ?	28-Feb-19	Stantec replied that the pipeline is tentatively located within the road allowance on the north side of County Road 46, also provided a link to the project website.
6	Member of the Public	Phone Call - Incoming	19-Feb-19	Member of the public called to express concern about the disruption the construction will cause to properties on/beside the proposed alignment. Also asked about what would happen to the large trees on his property that are close to the pipeline.	19-Feb-19	Stantec replied that the proposed route will only occur within the municipal road allowance and Enbridge will repair what is disturbed during construction and consider compensation for what cannot be repaired, to be discussed with a Land Agent.
7	Member of the Public	Exit Questionnaire	20-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) Construction timing may affect some infrastructure projects in the Town of Tecumseh at Intersection of 2) Location of destruction station conflict with development proposed		
8	Member of the Public	Exit Questionnaire	20-Feb-19	Member of the public stated that the content provided at the Information Session met their needs.		
9	Member of the Public	Exit Questionnaire	20-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) I understand the project outline and would like further information on moving existing gas meter located near road closer to my house. 2) Moving existing gas meter from road to front of house, new gas line already installed.		
10	Member of the Public	Exit Questionnaire	20-Feb-19	Member of the public provided the following comment on the exit questionnaire: 1) Old N. Talbot Road West of Wanning Road would be good for heavy equipment parking		
11	Member of the Public	Exit Questionnaire	20-Feb-19	Member of the public provided the following comment on the exit questionnaire: 1) Great information and access to project management details, strategies, et al. Well informed and detailed. Impressive organization of presentations.

Public, Landowners and Businesses

Comment Number	Stakeholder Group	Method of Communication	Date of Correspondence	Summary of Comment	Date Response Provided	Summary of Response
12	Member of the Public	Exit Questionnaire	20-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) your drawings led me to believe the new line was being installed on south side of the #46 but this was not the case at this time. Apparently, your collecting input from your property owners, misleading! 2) All of the above (access, noise, dust, traffic) also farm drainage and clean-up process will have impacts to us 3) Notes original easement 4) Want to be notified on all matters concerning this project - please.		
	Member of the Public	Exit Questionnaire	20-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) No clear picture of a possible larger station for the North West corner of . No alternatives shown for the location of this facility. 2) Any major facility proposed is totally unacceptable. 3) The flat lands located east of the Belle River and North of County Road 46 are being impacted by the outlet of a storm drain. The drain needs to be extended to the river. 3) RE: the current Union Gas facility at the northwest corner of County Road 27 and County Road 46 - any future improvement of County Road 27 by the County of Essex will require the relocation of this facility.		
13	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comment on the exit questionnaire: 1) The project will have no impacts to them, hopefully better gas capacity for new housing 2) when will construction start? How many years until completion?		
14	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) The only concern would be access to the field when we would be planting or harvesting. Usually the access to the field would not be blocked very long. 2) We don't have any serious concerns with our property because it is just farm land 3) have no other questions or comments at this time.		
15	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comment on the exit questionnaire: 1) Require Port Road to remain open so that we may continue to access Talbot Trial and		
16	Member of the Public	Public Meeting	21-Feb-19	Customer is concerned about the main being moved to the south side of the road. Says there is no room in the road allowance due to drainage, bell and water.		
17	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public noted on the exit questionnaire that traffic would impact them.		
18	Member of the Public	Public Meeting	21-Feb-19	Customer noted a private water main on west side of . Customer would like to further discuss location of pipeline from his home. Would like to know if he'll be disturbed during construction to tie over service.		
19	Member of the Public	Public Meeting	21-Feb-19	Customer had concerns about service along Highway 77.		
20	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comment on the exit questionnaire: 1) I have mature trees in close proximity to existing pipeline and would like to protect them or be able to move them if that's an option. 2) From my perspective, saving my trees the closer to Count Toady 46 the new pipeline gets installed the better for most landowners.

Comment Number	Stakeholder Group	Method of Communication	Date of Correspondence	Summary of Comment	Date Response Provided	Summary of Response
21	Member of the Public	Public Meeting	21-Feb-19	Customer noted a private watermain in front of residence expect near property line at . There is a relief valve for watermain in road allowance and access location at L . Interested in knowing final offering pipeline to his property line.		
22	Member of the Public	Public Meeting	21-Feb-19	Customer asked for information regarding enlarging an existing regulator site station on their property or if a new site could be acquired. Customer appears open to the idea of a station site, had no concerns about pipeline construction.		
23	Member of the Public	Public Meeting	21-Feb-19	Customer lives north of the , was interested in knowing the status of a Union Gas Pipeline on their property.		
24	Member of the Public	Public Meeting	21-Feb-19	Customer would like to have easements removed on his residential property, wants to know if Union Gas still needs the current easements.		
25	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) Close proximity of home to road, utility damage concerns. 2) Private water line, gas lines that exist presently.		
26	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) My property is at an intersection current gas line crosses ground line. Both roads are gravel and will be used by the traffic. Dust will be a problem thus affecting the air quality; therefor measures will be needed for dust control. 2) I have a row of trees along the road which are a wind break. I hope they can be persevered, if not replaced. Many drains are along the route. I'm concerned that they be repaired if necessary and put back into working order. 3) Will grass be replanted along this new gas line route? 4) will pressure from the pipeline be same for appliance usage as now?		
27	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) awaiting rod if old line will be removed from my area 2) If old line removed, landscaping, driveway and retaining wall potentially conflict with where line is. 3) Identified trees and drainage as importation things to consider during the environmental study. 4) Not currently, would like to be kept updated.		
28	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) Possibly access, noise, dust, traffic could have impacts to them 2) No additional questions or comments at the moment.		
29	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) Would like gas line closer to the road so trees and landscaping is not removed. 2) Identified trees and landscaping on my front lawn as important factors to consider.		
30	Member of the Public	Exit Questionnaire	21-Feb-19	Member of the public provided the following comments on the exit questionnaire: 1) Location of new line? No room at my property. 2) Line located close to resident is an impact to them 3) Trees along County Road 46, field drains running into covered road drain, 7 drains located along County Road 46 4) Suggested that it is installed next to existing line.

Comment Number	Stakeholder Group	Method of Communication	Date of Correspondence	Summary of Comment	Date Response Provided	Summary of Response
31	Member of the Public	Exit Questionnaire	21-Feb-19	<p>Member of the public provided the following comments on the exit questionnaire:</p> <p>1) The representatives did not know for certain if the line would run on the north or south side of the road in my location. I would like to know as I have vegetation I would like to move. We are not currently connected to the gas line. When the project is underway, I would like to have a connection installed.</p> <p>2) I work midnights and therefore sleep through the day. It would be helpful to know timelines in case I need to make alternative sleeping arrangements.</p> <p>3) The drainage ditch to the south of our location is home to "spring peeper" and a similar species. I have identified their location based on calls over processive years. The north ditch had (has) a green or leopard frog identified for multiple years, recent digging may have relocated it. The drainage ditch along Mauning (west) has a significant riparian zone inhabited yearly by downy wood pelican, great blue herons and at least one large snapping turtle. Last year was our first year sighting a kingfisher, swallows nest yearly in the large cement culverts along the waterway.</p>		
32	Member of the Public	E-mail - Outgoing	22-Feb-19	Stantec sent two maps, one showing the member of the publics property and the other a map of the broader area.	22-Feb-19	Member of the public replied that if the road behind their property isn't enough space to park the equipment, 12th Concession could be considered.
33	Member of the Public	E-mail Incoming	27-Feb-19	Member of the public states that no one can access their property without written prior consent.	27-Feb-19	Stantec replied that right now it is expected that only the municipal allowance will need to be accessed, but if access to your property is required for any reason, you will be contacted to reach an access agreement in advance.
34	Member of the Public	Phone Call - Incoming	4-Jun-19	Member of the public wasn't able to attend information session and was wondering when the project will be constructed, and who is responsible for cleanup of disturbed property.	13-Jun-19	Stantec indicated that construction is proposed to begin in February or March of 2020. The project is proposed to be constructed within the municipal road allowance only, and that Enbridge would reinstate the land to the conditions that were in place prior to construction. Stantec sent a copy of the information session boards and newsletter via email. <a href="mailto:jharder@citywindsor.ca">jharder@citywindsor.ca</a>

Dear Karla Barboza,

**Reference: Enbridge Gas Pipeline Project – Notice of Information Sessions Windsor Pipeline Replacement Project**

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

Dear Michele Doncaster,

**Reference: Enbridge Gas Pipeline Project – Notice of Information Sessions Windsor Pipeline Replacement Project**

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

The replacement is being completed as part of Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

Dear Zora Crnojacki,

**Reference: Enbridge Gas Pipeline Project – Notice of Information Sessions Windsor Pipeline Replacement Project**

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

Dear Crystal Lafrance,

**Reference: Enbridge Gas Pipeline Project – Notice of Information Sessions Windsor Pipeline Replacement Project**

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part of Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

[image007.png](#)  
[image008.png](#)

---

Hi Allan,

Yes, there will be temporary impact to the portion of the trail located within the municipal road allowance. During construction the most suitable crossing approach will be selected to construct the pipeline across the trail and paralleling road. At this time, the following two approaches are most likely: excavating a trench across the trail and road (pending permits) and lowering the pipe into the trench, or a trenchless crossing (installing the pipe without doing an open excavation, for example, using horizontal drilling). For either approach, the disruption to the public will be minimized and proactive safety measures taken to protect everyone. It will take a week, at most, to cross the trail and paralleling road in either scenario.

With respect to your section question, the new pipeline will be designed as a replacement pipeline and will accommodate the existing natural gas demand on the distribution system. The intent of the project is not to increase supply to the greenhouse sector in the area you identified or to any other part of Enbridge Gas Inc.'s service area. Enbridge Gas Inc. (operating as Union Gas) is constructing another project this year (2019), the Kingsville Transmission Reinforcement Project, that will support increased market demand for the greenhouse sector in Leamington and Kingsville. Here is a link to the Kingsville Project website where you can find out more information: <https://www.uniongas.com/projects/kingsville-transmission-reinforcement>. To support the growing greenhouse market in the area you've identified, Enbridge Gas Inc. is proposing to reinforce the system on an as-required basis

Regards,

Laura

Hi Laura,

Thank you for your letter of February 1, 2019 regarding the subject pipeline project. Preliminarily, Leamington has two points of interest.

1. We own the former rail corridor, now developed into a segment of the Trans Canada Trail network (shown in figure below), and crossing Road 309. Will there be impact to the trail and trail entrances?
2. Will this proposed line have any impact to providing service to our greenhouse sector that is developing along Hwy 77 south of County Road 8.

**Subject:** Enbridge Gas Pipeline Project – Notice of Information Sessions for the Windsor Pipeline Replacement Project

Good afternoon Kourosh,

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. Please note that as of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016). The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions. You are receiving this email because you were identified as an agency representative and/or a member of the Ontario Pipeline Coordinating Committee (OPCC).

Please see attached for further information regarding the project (including a map), the process, and upcoming information sessions. If you would prefer to receive a hardcopy of the attached materials, please do not hesitate to let me know. Please also feel free to call or email me with your comments, questions or concerns regarding the project.

**MTCS File : 0010281**  
**Your File : 160961289**  
**Proponent : Enbridge Gas**  
**Subject : Notice of Information Session**  
**Project : Windsor Pipeline Replacement Project**  
**Location : From the Sandwich Compressor Station between Del Duca Drive and County Road 46, Town of Tecumseh, following County Road 46 to Lakeshore Road 309, Town of Lakeshore, following Goodreau Line to the Alma Gate Station, Municipality of Chatham-Kent**

Dear Ms. Hill:

Thank you for providing the Ministry of Tourism, Culture and Sport (MTCS) with the Notice of Information Session for the above-referenced project. MTCS's interest in this Environmental Assessment (EA) project relates to its mandate of conserving Ontario's cultural heritage, which includes:

- Archaeological resources, including land and marine;
- Built heritage resources, including bridges and monuments; and,
- Cultural heritage landscapes.

Under the EA process, the proponent is required to determine a project's potential impact on cultural heritage resources.

### Project Summary

Enbridge Gas Inc. is proposing to replace approximately 60 km of the existing 8- to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. This is part of Enbridge's pipeline monitoring and integrity program, proceeding under the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*.

### Identifying Cultural Heritage Resources

While some cultural heritage resources may have already been formally identified, others may be identified through screening and evaluation. Indigenous communities may have knowledge that can contribute to the identification of cultural heritage resources, and we suggest that any engagement with Indigenous communities includes a discussion about known or potential cultural heritage resources that are of value to these communities. Municipal Heritage Committees, historical societies and other local heritage organizations may also have knowledge that contributes to the identification of cultural heritage resources.

### Archaeological Resources

This EA project may impact archaeological resources and should be screened using the MTCS [Criteria for Evaluating Archaeological Potential](#) to determine if an archaeological assessment is needed. MTCS archaeological sites data are available at [archaeology@ontario.ca](mailto:archaeology@ontario.ca). If the EA project area exhibits archaeological potential, then an archaeological assessment (AA) should be undertaken by an

archaeologist licenced under the *OHA*, who is responsible for submitting the report directly to MTCS for review.

### **Built Heritage and Cultural Heritage Landscapes**

The MTCS [Criteria for Evaluating Potential for Built Heritage Resources and Cultural Heritage Landscapes](#) should be completed to help determine whether this EA project may impact cultural heritage resources. The Clerk for each of the municipalities noted above can provide information on property registered or designated under the *Ontario Heritage Act*. Municipal Heritage Planners can also provide information that will assist in completing the checklist.

If potential or known heritage resources exist, MTCS recommends that a Heritage Impact Assessment (HIA), prepared by a qualified consultant, should be completed to assess potential project impacts. Our Ministry's [Info Sheet #5: Heritage Impact Assessments and Conservation Plans](#) outlines the scope of HIAs. Please send the HIA to MTCS and the local municipalities for review, and make it available to local organizations or individuals who have expressed interest in review.

### **Environmental Assessment Reporting**

All technical cultural heritage studies and their recommendations are to be addressed and incorporated into EA projects. Please advise MTCS whether any technical cultural heritage studies will be completed for this EA project, and provide them to MTCS before issuing a Notice of Completion or commencing any work on the site. If screening has identified no known or potential cultural heritage resources, or no impacts to these resources, please include the completed checklists and supporting documentation in the EA report or file.

Thank you for consulting MTCS on this project and please continue to do so throughout the EA process. If you have any questions or require clarification, do not hesitate to contact the undersigned.

Sincerely,

Katherine Kirzati  
Heritage Planner  
[katherine.kirzati@ontario.ca](mailto:katherine.kirzati@ontario.ca)

It is the sole responsibility of proponents to ensure that any information and documentation submitted as part of their EA report or file is accurate. MTCS makes no representation or warranty as to the completeness, accuracy or quality of the any checklists, reports or supporting documentation submitted as part of the EA process, and in no way shall MTCS be liable for any harm, damages, costs, expenses, losses, claims or actions that may result if any checklists, reports or supporting documents are discovered to be inaccurate, incomplete, misleading or fraudulent.

Please notify MTCS if archaeological resources are impacted by EA project work. All activities impacting archaeological resources must cease immediately, and a licensed archaeologist is required to carry out an archaeological assessment in accordance with the *Ontario Heritage Act* and the *Standards and Guidelines for Consultant Archaeologists*.

If human remains are encountered, all activities must cease immediately and the local police as well as the Registrar, Burials of the Ministry of Government and Consumer Services (416-326-8800) must be contacted. In situations where human remains are associated with archaeological resources, MTCS should also be notified to ensure that the site is not subject to unlicensed alterations which would be a contravention of the *Ontario Heritage Act*.

**Subject:** Windsor - Robert Croft Inquiry  
**Date:** Tuesday, February 19, 2019 1:01:22 PM

---

I just took a phone call from .

Generally, he expressed concern about the disruption the construction will cause to properties on/beside the proposed alignment. He recalls recent pipeline construction that happened on Naylor Sideroad and how long it took to get done, and the level of land disturbance that occurred there. I let him know that construction is proposed to occur only within the municipal road allowance.

Specifically, he asked about what would happen to the large trees that he has close to the pipeline. I couldn't answer his question specifically, not knowing all the circumstances; he said he would be in attendance tomorrow and I said he can show someone there and discuss. He said his son also has a sprinkler system that could be affected. He asked about compensation for those things and I let him know that Enbridge will repair what is disturbed during construction and consider compensation for what cannot be repaired, to be discussed with a Land Agent.

Thanks!

Laura

**Subject:** FW: Enbridge Gas Pipeline Project – Notice of Information Sessions for the Windsor Pipeline Replacement Project

Good morning Laura,

Our regional office has reviewed and offers the following general requirements:

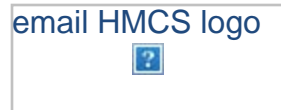

- MTO permits will be required for any work within 45m of any limit of a provincial highway right-of-way or within 395m of the centre point of an intersection on a highway.
- Crossings or parallel installations on a highway should be avoided if possible.
- Parallel installations within the highway corridor will only be considered/permitted in the absence of any other viable alternative routes (not permitted on Class 1 Highways such as Highway 401)
- If crossings of the highway are unavoidable, they will need to be installed through trenchless methods. Highway crossings may be required to be fully encased within the highway right-of-way.
- Details of the highway crossings must be submitted for our review and approval prior to the proposed pipeline's construction. This should include, but not be limited to, Geotechnical Investigation reports, plans and cross sections indicating the location, depth, and type of crossing for the pipe etc.

I trust this is satisfactory.

Thanks.

Tony Di Fabio

**Subject:** Enbridge Gas Pipeline Project – Notice of Information Sessions for the Windsor Pipeline Replacement Project

Good afternoon Tony,

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. Please note that as of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016). The environmental study process includes consultation and engagement with landowners, municipalities, agencies, Indigenous communities, and other interested parties through notices, mailouts, meetings, and Information Sessions. You are receiving this email because you were identified as an agency representative and/or a member of the Ontario Pipeline Coordinating Committee (OPCC).

Please see attached for further information regarding the project (including a map), the process, and upcoming information sessions. If you would prefer to receive a hardcopy of the attached materials, please do not hesitate to let me know. Please also feel free to call or email me with your comments, questions or concerns regarding the project.

Regards,

Leamington ON N8H 1P5

**Attention: Chief Mary Frances Duckworth**

Dear Chief Frances Duckworth,

**Reference: Enbridge Gas Pipeline Project – Notification of Information Sessions  
Windsor Pipeline Replacement Project**

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with Indigenous communities, landowners, municipalities, agencies, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

**Wednesday Feb. 20, 2019**

4-8 p.m.  
Ciociaro Club of Windsor

Oldcastle, ON N0R 1L0

**Thursday Feb. 21, 2019**

4-8 p.m.  
Comber & District Community Centre  
7100 Community Centre Street  
Comber, ON N0P 1J0

Enbridge Gas will maintain service of the existing Windsor pipeline during construction of the proposed pipeline. Once the new pipeline has been constructed, the existing pipeline will be abandoned in place or removed.

Cadwell First Nation is invited to attend the Information Sessions and provide comments regarding the proposed project. Specifically, Stantec is seeking information about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those adverse impacts. Stantec is also seeking background environmental and socio-economic information that may be useful in compiling an inventory.

If you cannot attend the Information Sessions learn more about the project, please contact the undersigned.

Additional project information is available at: [uniongas.com/projects](http://uniongas.com/projects).

Enbridge Gas will maintain service of the existing Windsor pipeline during construction of the proposed pipeline. Once the new pipeline has been constructed, the existing pipeline will be abandoned in place or removed.

Chippewas of Kettle and Stony Point is invited to attend the Information Sessions and provide comments regarding the proposed project. Specifically, Stantec is seeking information about any adverse impacts that the project may have on constitutionally protected aboriginal or treaty rights and any measures for mitigating those adverse impacts. Stantec is also seeking background environmental and socio- economic information that may be useful in compiling an inventory.

If you cannot attend the Information Sessions learn more about the project, please contact the undersigned.

Additional project information is available at: [uniongas.com/projects](http://uniongas.com/projects).

**Attention: Chief Henry Myeengun**

Dear Chief Myeengun,

**Reference: Enbridge Gas Pipeline Project – Notification of Information Sessions  
Windsor Pipeline Replacement Project**

Enbridge Gas Inc. operating as Union Gas is proposing to replace the existing 8 to 10-inch diameter Windsor Line natural gas pipeline with a new 6-inch diameter pipeline. The replacement is being completed as part Enbridge's continual pipeline monitoring and integrity program. The Windsor Line serves the communities of Tecumseh, Lakeshore, Chatham-Kent, Essex, Leamington, Kingsville, Windsor and surrounding areas. (Note: As of Jan. 1, 2019, Union Gas and Enbridge Gas Distribution have amalgamated into one utility with the legal name Enbridge Gas Inc.)

The proposed project involves replacing approximately 60 km of the existing Windsor Line with a new pipeline that will be constructed in the vicinity of the existing pipeline. The proposed pipeline will begin in the vicinity of Enbridge Gas' Sandwich Compressor Station between Del Duca Drive and County Road 46 in the Town of Tecumseh, and will follow County Road 46 to Lakeshore Road 309 in the Town of Lakeshore. The proposed pipeline will then follow Goodreau Line to the existing Enbridge Gas Port Alma Gate Station in the Municipality of Chatham-Kent. The project is subject to Ontario Energy Board (OEB) approval. If approved, construction of the pipeline could begin as early as spring 2020.

As an integral part of this project, Enbridge Gas has retained Stantec Consulting Ltd. to undertake an environmental study of the construction and operation of the proposed pipeline and related facilities. The environmental study will fulfill the requirements of the Ontario Energy Board's (OEB) *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario (2016)*. The environmental study process includes consultation and engagement with Indigenous communities, landowners, municipalities, agencies, and other interested parties through notices, mailouts, meetings, and Information Sessions.

An Environmental Report, summarizing the results of the environmental study, will accompany Enbridge Gas' application to the OEB. The Environmental Report for the proposed project is anticipated to be completed and submitted to the OEB as early as spring 2019.

Two Information Sessions are planned to seek feedback on the project in general and the preferred pipeline route. The Information Sessions will be conducted as a drop-in, and representatives from both Enbridge Gas and Stantec Consulting Ltd. will be available to answer questions.

Hi ,

The proposed pipeline route generally follows the existing pipeline. The exception is that where the existing pipeline cuts across agricultural fields, the proposed pipeline is currently planned to stay roadside, within the road allowances.

The existing pipeline is located on the north side of roads (from east to west) Goodreau Line, Lakeshore Road 309 and County Road 46, except for in one spot. The existing pipeline is located to the south of Lakeshore Road 309, between Rochester-Townline Road and the Ruscom River.

We are currently working on more detailed mapping that will be presented at the open house. Will you be able to attend one of the sessions?

Thanks,

Laura

Mark,

Just wanted to pass along a few notes that have from the Public Open House held last Thursday night, Feb 21st in Comber for your records.

I spoke with the following individuals: (see attached GEO)

1.

They asked for Jeff Fasoyiro as they have been previously approached regarding enlarging an existing regulator site station on their property ( ) or acquiring a new site. Since Jeff was not there, I spoke with them and showed a photo a similar station site. They seemed open to the idea and asked that Jeff reach out to them. No concerns re pipeline construction.

2.

. Lives north of our Port Alma

Transmission Station, same side. Turns out he is not directly affected, so they weren't too concerned about the proposed Pipeline Replacement work, however more interested in knowing what the status of a Union Gas Pipeline within their property. I stated I would look into it and get back to them. Turns out it is an abandoned 1" steel service line. Have options and will work with them at their costs, otherwise left as is.

3. . Wasn't real concerned about the proposed Pipeline Construction works, however would like it removed, but rather what Union Gas Easements were registered on his residential property on the south side of and did we still need them. I stated I would get back to him once I reviewed our working files. Appears some of the Easements are not required so will work with him to release, provided he covers any costs.

That's about it.

---

Good afternoon ,

Thank you for taking the time to speak with me on the phone today. I understand you are concerned about the project's potential impact to the trees on your property. As we discussed, the pipeline is currently planned to be located entirely within the municipal road allowance. The final location for the new pipeline is still being discussed with the municipality, and could change. Landowners will be notified of the final pipeline location, which should be finalized in the upcoming months. Construction is currently planned for spring of 2020.

Here is an aerial shot of your property. The yellow dashed line is the existing pipeline, and the red line is the preliminary preferred route. I told you on the phone that the pipeline was proposed to be on the north side of the road, but it looks like I made a mistake, as you can see below. Again, the final location is still being determined. The approach for decommissioning the existing pipeline is also still being determined.

I also mentioned that Enbridge will meet with directly affected landowners. Enbridge will discuss compensation with those landowners, which may be offered for land rights, disturbance and crop loss (as applicable). I have included a PDF copy of the information panels that were at the open house, for your review. They contain some of the same information I just mentioned, and more details as to the project timing and process.

Thanks again and please feel free to call or email with any additional concerns or questions you have.

Laura

Hi ,

I see that your property is located on the south side of . The proposed pipeline is tentatively located within the road allowance on the north side of . However, the side of the road for the proposed pipeline is still pending final input from the municipality.

There will be construction activity within the municipal road allowance, which would include excavating a trench to install the pipeline. Construction activities would be short term (approximately one to two weeks in front of the property) and any construction impacts would be repaired after the pipeline installation is complete. Some disturbance to private lands will be required to replace service connections to existing customers this work will also involve restoration of construction impacts. Enbridge gas will reach out directly to landowners for permission prior to accessing any private lands. Additional construction disturbance may follow one year after construction associated with the removal or abandonment of the existing pipeline.

Hi ,

I apologize for the delay. The pipeline is tentatively located within the road allowance on the north side of County Road 46 in Ruscom Station. However, this is still pending final input from the municipality.

The information that was shared at the open house will be posted online to the project website shortly. The website is <https://www.uniongas.com/projects/windsor-line-replacement>

Please let me know if you have any additional questions.

Thanks Mark,  
If the (closed off and unused) road behind my tiny slice of property isn't enough space to park your equipment (old North Talbot), you might consider 12<sup>th</sup> Concession which is a dead end (not much traffic).  
VBR,

---

Hi ,

Thank you again for your voicemail. As discussed on the phone, here is a copy of the information panels that were used at the open house. I've also attached a copy of the project newsletter.

You can also go to <https://www.uniongas.com/projects/windsor-line-replacement> for the latest updates.

Thanks,

Laura

*Please contact our office to identify any "open cut" water crossings. According to the information provided at the open house - it appears most crossings will be utilizing a directional bore method which will be more appropriate to our requirements*

4. Please indicate if the project will have any impacts to you, your property or your business that you would like addressed (i.e., access, noise, dust, traffic, etc.).

*More CW water crossings will require ERCA permits*

5. Please identify any features along the Preferred Route that you feel are important to consider during the environmental study.

- Major water crossings will require BMP's and Sediment Mitigation*
- Abandoned Rail Line crossings may contain Habitat or ESA or SAR - consider MRF for Recommendations*
- "works in water" DFO Fish Windows*

6. Do you have any other questions or comments about this project that you would like to bring to our attention?

Thank you for completing this questionnaire

If you would like someone to contact you about any items identified above please provide us with your contact information.

Unless indicated otherwise, personal information and all comments will become part of the public record and may be publicly released as part of project documentation.

**INFORMATION SESSION QUESTIONNAIRE**  
**Public Information Session – Thursday, February 21, 2019**  
**Comber Community Centre**

Please look over the display panels, and then take a few moments to provide your comments below. Your input is welcomed and appreciated. If you require any assistance or clarification while completing the questionnaire please speak with an Enbridge or Stantec representative.

Completed questionnaires can be returned to a Stantec representative or mailed to Stantec Consulting Ltd. by **March 8, 2019**. Postage paid, self-addressed envelopes are available at the registration table.

**1. How did you hear about this Public Information Session? (check all that apply)**

- |   |   |
|---|---|
| <input type="checkbox"/> Newspaper ad (which one?) _____            | <input checked="" type="checkbox"/> Project Notification Letter |
| <input type="checkbox"/> From a friend or neighbour (word of mouth) | <input type="checkbox"/> Social Media                           |
| <input type="checkbox"/> Other (please specify): _____              |   |

**2. Which best describes your interest in the project?**

- |   |   |  |   |
|---|---|--|---|
| <input checked="" type="checkbox"/> Directly affected landowner | <input type="checkbox"/> Adjacent landowner       | <input type="checkbox"/> Government Official           | <input type="checkbox"/> Local business |
| <input type="checkbox"/> Interested Citizen                     | <input type="checkbox"/> Member of Interest Group | <input type="checkbox"/> Other (please specify): _____ |   |

**3. Did the content provided at this Information Session meet your needs? If no, please list your questions below and provide a description on how you think we can best address them?**

- Yes       No – please explain       Partly – please explain

---

---

---

---

---

---

4. Please indicate if the project will have any impacts to you, your property or your business that you would like addressed (i.e., access, noise, dust, traffic, etc.).

The only concern would be access to the 50 acre field when we would be planting or harvesting but usually the access to the field would not be blocked very long.

5. Please identify any features along the Preferred Route that you feel are important to consider during the environmental study.

We don't have any serious concerns with our property because it is just bare land

6. Do you have any other questions or comments about this project that you would like to bring to our attention?

None at this time

Thank you for completing this questionnaire

4. Please indicate if the project will have any impacts to you, your property or your business that you would like addressed (i.e., access, noise, dust, traffic, etc.).

yes, I have 6 mature trees in close proximity to existing pipeline and would like to protect them or be able to move them if that's an option.

5. Please identify any features along the Preferred Route that you feel are important to consider during the environmental study.

from my perspective, saving my trees :) the closer to County Road 46 the new pipeline gets installed the better for most landowners

6. Do you have any other questions or comments about this project that you would like to bring to our attention?

*Some questions I had forgotten to ask, see back.*

4. Please indicate if the project will have any impacts to you, your property or your business that you would like addressed (i.e., access, noise, dust, traffic, etc.).

My property is at the intersection of  
Current Gas line crosses Glenwood line over to Gondreau line.  
Both roads are gravelled and will be used by the traffic.  
Dust will be a problem thus affecting the air quality;  
therefore measures will be needed for dust control!

5. Please identify any features along the Preferred Route that you feel are important to consider during the environmental study.

I have a row of 6 evergreen trees along the  
which serve as a wind break.  
I hope these can be preserved, if not replaced.  
Many drains are along this route. I'm concerned that  
they be repaired if necessary and put back in working order.

6. Do you have any other questions or comments about this project that you would like to bring to our attention?

Will grass be replanted along the new  
gas line route?  
Will pressure from this pipeline be same  
for appliance usage as now?

Thank you for completing this questionnaire

- Yes  No – please explain  Partly – please explain

The representatives did not know for certain if the line would run on the north or south side of the road in my location. I would like to know as I have vegetation I would like to move. We are not currently connected to the gas line. When the project is underway I would like to have an connection installed.

4. Please indicate if the project will have any impacts to you, your property or your business that you would like addressed (i.e., access, noise, dust, traffic, etc.).

I work midnights and therefore sleep through the day it would be helpful to know timelines in case I need to make alternate sleeping arrangements.

5. Please identify any features along the Preferred Route that you feel are important to consider during the environmental study.

The drainage ditch to the south of our location is home to "spring peeper" frogs or a similar species. I have identified their location based on calls over successive years. The north ditch had (had) a green or leopard frog identified for multiple years. Recent digging may

6. Do you have any other questions or comments about this project that you would like to bring to our attention?

have relocated it. The drainage ditch along Manning (west) has a significant riparian zone inhabited yearly by orioles, downy woodpecker, great blue herons, and at least one large snapping turtle (dinner plate sized) last year was our first year sighting a kingfisher. Swallows re-nest yearly in the large cement culverts along this waterway.
