# Qualified Products List

## Foodservice

### Table of contents

Page	Product	Product requirements
3	ENERGY STAR combi oven	Natural gas-powered commercial oven. 6 – 29+ pan capacity are eligible.
5	ENERGY STAR convection oven	Natural gas-powered full-size single, standard convection oven. Must have a minimum energy efficiency of 46 percent and idle energy rate of 12,000 BTU/hr.
7	ENERGY STAR dishwasher	Stationary single tank door dishwasher. Product must be connected to an Enbridge Gas natural gas-fuelled hot water source. The following are eligible: <ul style="list-style-type: none"><li>• High temperature stationary single tank door type dishwasher: idle energy rate (kW) of <math>\leq 0.55</math> kW and water consumption (GPR) <math>\leq 0.89</math> GPR</li><li>• Low temperature stationary single tank door type dishwasher: idle energy rate (kW) of <math>\leq 0.30</math> kW and water consumption (GPR) <math>\leq 1.18</math> GPR</li></ul>
9	ENERGY STAR fryer	Natural gas-powered commercial fryer, standard or large vat.
13	ENERGY STAR griddle	Natural gas-powered, single-side commercial griddle. All widths of griddles are allowed. Double sided, clamshell griddles are not eligible.
14	ENERGY STAR rack oven	Natural gas-powered single and double rack ovens. Must have a minimum efficiency of 51 percent for single rack and 56 percent for double rack.
15	ENERGY STAR steam cooker	Natural gas-powered commercial steam cooker, 5-pan or larger in size. Must have a minimum efficiency of 38 percent and a maximum idle-rate of 12,500 BTU/hr.
16	High-efficiency conveyor broiler	Natural gas-powered conveyor broilers. Must have a low idle energy rate of $\leq 60,000$ BTU/hr, while maintaining 600 F when tested in accordance with ASTM F2239. The following sizes are eligible: <ul style="list-style-type: none"><li>• &lt;22" belt width</li><li>• 22" – 26" belt width</li><li>• &gt;26" belt width</li></ul>
17	High-efficiency conveyor oven	Natural gas-powered conveyor ovens that have a cooking chamber area of less than 1,520 sq. inches with a minimum efficiency of 37 percent and natural gas conveyor ovens with a cooking chamber area of greater than 1,520 sq. inches with a minimum efficiency of 45 percent.
18	High-efficiency under-fired broiler	Natural gas-powered commercial high-efficiency under-fired broiler. Must have a low idle energy rate of <22,000 BTU/hr per linear foot, while maintaining 600 F when tested in accordance with ASTM F1695. The following sizes are eligible: <ul style="list-style-type: none"><li>• 2' broiler</li><li>• 3' broiler</li><li>• 4' broiler</li><li>• 5' broiler</li><li>• 6' broiler</li></ul>
