

Proposed 2025 Waubuno Well Drilling Project
Notice of Study Commencement and Virtual Public Information Session
 TOWNSHIP OF ST. CLAIR (LAMBTON COUNTY), ONTARIO
 ENBRIDGE GAS INC.

The Study

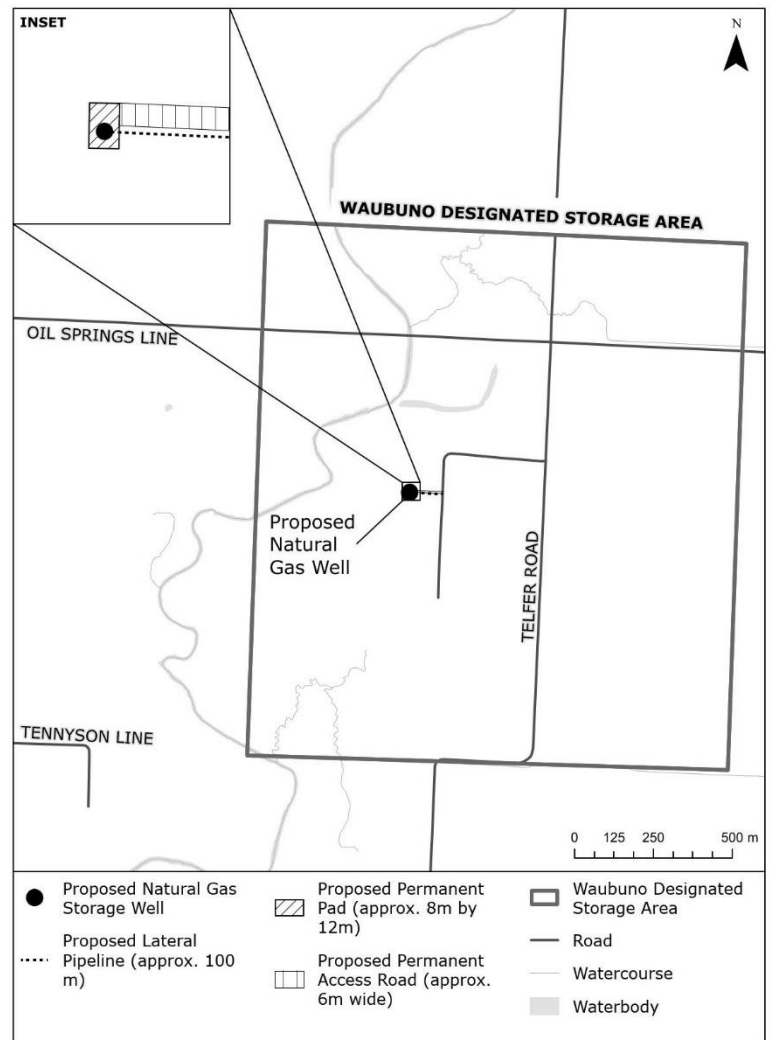

Enbridge Gas has retained Dillon Consulting to undertake an environmental study for the proposed 2025 Waubuno Well Drilling Project in Lambton County, Ontario.

To ensure the continued safe and reliable delivery of natural gas to existing and future Enbridge Gas customers, Enbridge Gas is proposing to drill one new natural gas storage well and install approximately 100 metres of 8-inch natural gas pipeline in the Waubuno Designated Storage Area (DSA) – an area of land designated by the Ontario Energy Board (OEB) under section 36.1(1)(a) of the *OEB Act*, which contains geological formations suitable for the storage of natural gas underground.

The proposed well and pipeline location is approximately 650 metres southwest of the intersection of Telfer Road and Oil Springs Line in the Township of St. Clair. Project activities will commence with the construction of a temporary gravel drilling pad measuring up to 60 metres by 100 metres. Upon completion of drilling activities, a permanent gravel pad measuring 8 metres by 12 metres will be installed around the well and the new natural gas pipeline will be installed.

The Process

The study is being conducted in accordance with the *OEB's Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Projects and Facilities in Ontario, 8th edition* (2023). The study will review the need and justification for the project, describe the existing natural, cultural and socio-economic environment, evaluate the project from a natural, cultural, and socio-economic perspective, outline safety measures, and provide appropriate measures for impact mitigation and monitoring. Pending a positive recommendation from the OEB to the Minister of Natural Resources for the issuance of well drilling licences under section 40 of the *OEB Act*, construction is planned to begin as early as spring 2025.

Invitation to the Community

Stakeholder and Indigenous consultation is a key component of this study. Members of the general public, landowners, government agencies, Indigenous communities, and other interested parties are invited to participate in the study. We are hosting a Virtual Public Information Session to provide you with an opportunity to review the project and provide input.

To access the Virtual Public Information Session, visit: www.WaubunoWellDrilling.ca from **Thursday, August 29, 2024 to Friday, September 6, 2024**.

If you are interested in participating or would like to provide comments, please visit the Virtual Public Information Session or contact one of the individuals listed below through the project email. The last day to submit comments for consideration in the draft environmental study is **September 19, 2024**. You can also visit the **Enbridge Gas Project Website** at www.enbridgegas.com/2025WellProject.
