

NOTICE OF APPLICATION

Enbridge Gas Inc. has applied for an exemption from the requirement to obtain leave to construct for approximately 1.6 km of natural gas pipeline in the City of Toronto

Enbridge Gas Inc. (Enbridge Gas) has applied under section 95 (1) of the *Ontario Energy Board Act, 1998* (OEB Act) for an exemption from the requirement to obtain leave to construct approximately 1.6 km of natural gas pipeline and related assets (Project). The Project consists of:

- 1,100 m of NPS 8-inch polyethylene (PE) intermediate pressure (IP) natural gas pipeline
- 120 m of NPS 2-inch PE IP natural gas pipeline
- 35 m of NPS 6-inch PE IP natural gas pipeline
- 360 m of NPS 4-inch PE IP natural gas pipeline
- A new Header Station
- A new District Station

Enbridge Gas submits that the Project should be exempt from the requirement to obtain leave to construct due to special circumstances, including:

- The Project is needed to accommodate the construction of the Ontario Line, a priority transit project being developed by the Province of Ontario, the City of Toronto, and Metrolinx
- That Metrolinx will pay for the Project and there will be no cost impacts on existing ratepayers
- All lands required for the Project are under the control of Metrolinx and the City of Toronto
- An exemption supports the spirit and stated purpose of the *Building Transit Faster Act, 2020*, which is to expedite the delivery of transit projects of provincial significance by removing barriers and streamlining processes that may result in delays to the timely completion of these projects

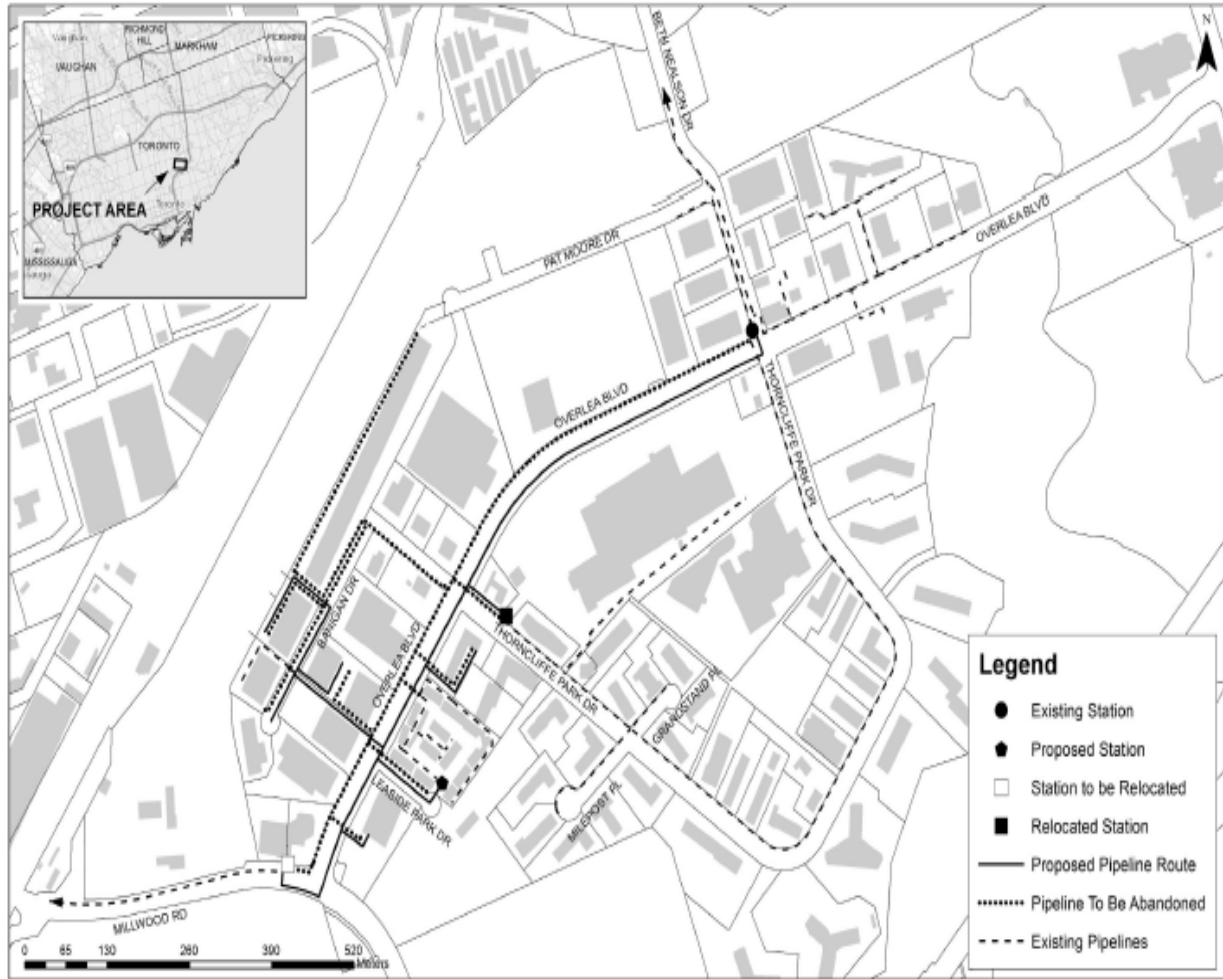

The Project includes an approximately 70 m section of new pipeline that will be larger in diameter than the original pipeline it is replacing.

In this application, the OEB will determine whether there are special circumstances that warrant granting Enbridge Gas an exemption from the requirement of seeking leave to construct a hydrocarbon pipeline under subsection 90 (1) of the (*OEB Act*). If an exemption is granted, no further approval will be needed from the OEB to allow Enbridge Gas to construct the Project.

Enbridge Gas filed a previous application under section 90 (1) of the *OEB Act*, that sought leave to construct the Overlea Station project (EB-2024-0141). The previous application is presently in abeyance pending the outcome of the current application.

The location of the proposed pipelines is shown in the map.

Ontario Line (OL) - Overlea Relocation

YOU SHOULD KNOW

There are three types of OEB Hearings: oral, electronic and written. Enbridge Gas has requested that the application be heard without a hearing. If you think a hearing is needed, you can write to us to explain why and what type. During a hearing, the OEB will question the applicant about its case and will also hear questions and arguments from participants that have registered as Intervenors. After reviewing all the evidence, the OEB will decide whether to approve this application.

HAVE YOUR SAY

You have the right to information about this application and to participate in the process. Visit www.oeb.ca/notice and use file number **EB-2024-0250** to:

- Review the application
- Apply to become an intervenor
- File a letter with your comments

IMPORTANT DATES

You must engage with the OEB on or before **October 10, 2024**, to:

- Provide input on the hearing type
- Apply to be an intervenor

If you do not, the proceeding will move forward without you, and you will not receive any further notice of the proceeding.

PRIVACY

If you write a letter of comment, your name and the content of your letter will be put on the public record and the OEB website. If you are a business or if you apply to become an intervenor, all the information you file will be on the OEB website.
