

## Enbridge Gas Inc. has applied to construct natural gas pipelines in the City of Ottawa

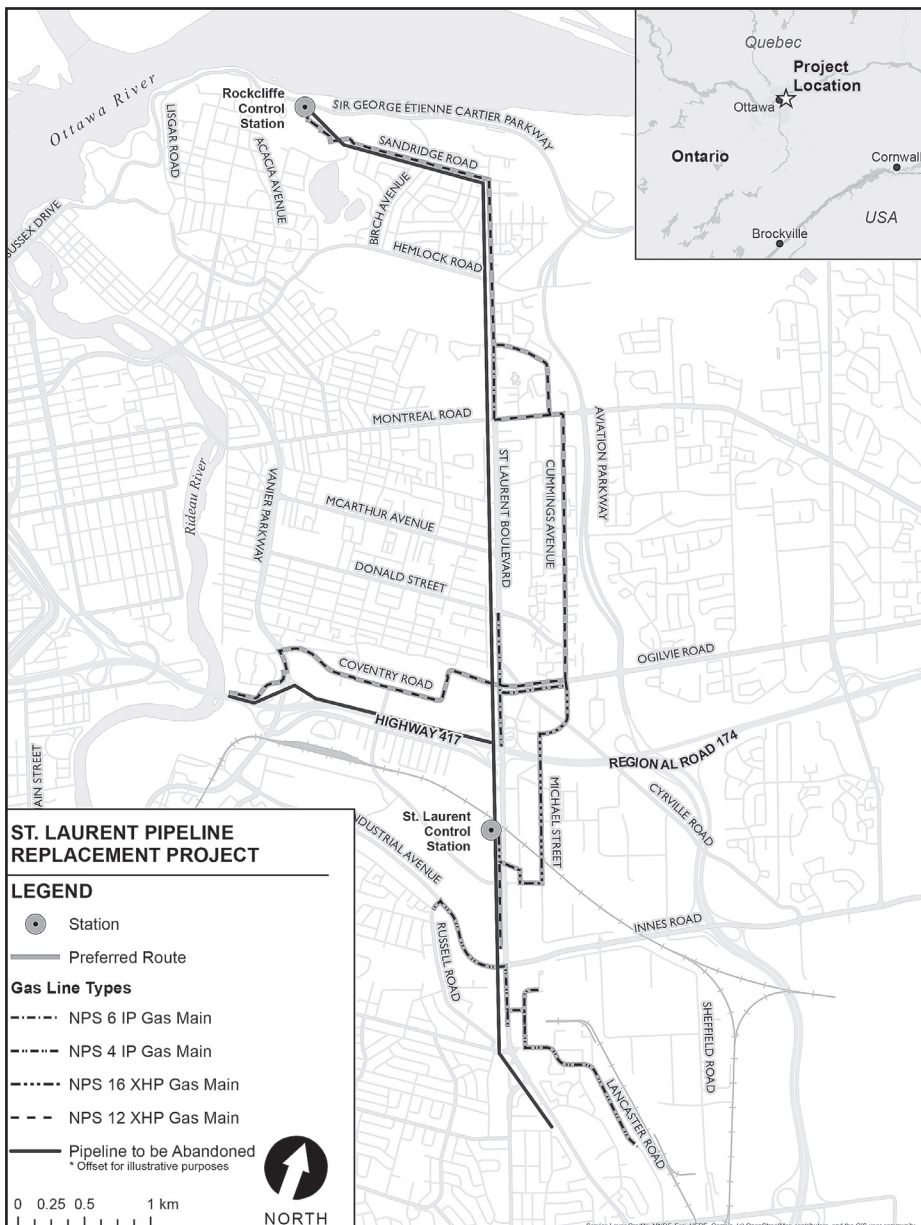

Enbridge Gas Inc. is asking the OEB for permission to construct approximately 17.6 km of natural gas pipeline in the City of Ottawa, comprised of approximately:

- 10.0 km of Nominal Pipe Size (NPS) 12 Extra High Pressure (XHP) Steel Coated (ST) natural gas pipeline.
- 2.5 km of NPS 16 XHP ST natural gas pipeline.
- 0.3 km NPS 6 XHP ST natural gas pipeline.
- 0.9 km NPS 6 Intermediate Pressure (IP) polyethylene (PE) natural gas pipeline.
- 3.9 km of NPS 4 IP PE natural gas pipeline.

The proposed pipelines would replace 14.4 km of existing natural gas pipelines along St. Laurent Boulevard, Sandridge Road and Tremblay Road in the City of Ottawa.

Enbridge Gas plans to construct ancillary facilities as well.

Enbridge Gas Inc. has also applied for approval of the forms of agreements it will offer to landowners affected by the routing or location of the proposed pipelines.

Enbridge Gas Inc. states that the replacement of the existing natural gas pipelines is required to address potentially significant consequences to safety and operational reliability on the St. Laurent Pipeline System.

**The location of the proposed pipelines is shown in the map.**

The OEB will also assess:

- The applicant's compliance with the OEB's *Environmental Guidelines for the Location, Construction and Operation of Hydrocarbon Pipelines and Facilities in Ontario*.
- Whether the duty to consult with Indigenous Communities potentially affected by the proposed pipeline has been discharged with respect to the application.
